CARFAX Report Provided By:
 Kia Motors America
 [REDACTED]
 Irvine, CA [REDACTED]

	No accident / damage reported to CARFAX
	2 Previous owners
	14 Service records available
	Personal vehicle
	25,779 Last reported odometer reading
	Worth \$1,260 more than retail book value

This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 8/20/15 at 4:28:47 PM (EDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Price Calculator™

Adjust the value of this 2013 Kia Forte LX based on the information available in this report

1) Retail Book Value

\$ 0

Enter retail book value here

2) CARFAX Price Adjustment™

+

+ \$1,260

=

Above retail book value

3) Adjusted Retail Value

Begin by entering the retail book value

Start by entering the retail book value from a pricing guide website.

\$

This vehicle is worth more than average, based on information in this report.

Compare adjusted retail value to seller's asking price when making your decision.

Avoid financial headaches. Make sure the loan has been paid off if you're buying from a private seller.

Have Questions? Consumers, please visit our Help Center at www.carfax.com. Dealers or Subscribers, please visit our Help Center at www.carfaxonline.com.

**Glossary**[View Full Glossary](#)**CARFAX Price Adjustment™**

Accidents, service records, number of owners and many other history factors can affect a vehicle's value. The CARFAX Price Adjustment is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX affects the value of a particular vehicle. The vehicle's retail book value plus the CARFAX Price Adjustment will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

KIA MOTORS AMERICA
[REDACTED]
IRVINE, CA [REDACTED]

Type of Loss:	Vehicle Fire
VIN/DOT Number:	KNAFT4A20[REDACTED]
Year:	2013
Make:	13 KIA FORTE
Model:	FORTE
Your Claim No:	[REDACTED]
Our Insured:	[REDACTED]
Address:	[REDACTED] TAMPA, FL [REDACTED]
Our Claim No:	[REDACTED]
Date of Loss:	08-17-15
Damages:	\$13,184.71

NOTICE OF SUBROGATION CLAIM

Please accept this letter as formal notice of our subrogation rights in regard to the above-captioned claim. Demand is hereby made upon you for payment of Progressive American Insurance Company damages and those of our insured.

Our investigation indicates damages to our insured's vehicle was a direct result of a manufacturer's defect or negligence on your behalf. Enclosed please find all supporting documentation.

Please acknowledge receipt of my subrogation demand and forward your payment of \$13,184.71 to my attention, payable to "Progressive American Insurance Company, as subrogee of [REDACTED]" and remit to the following address:

Progressive-Subro
[REDACTED]
Chicago, IL [REDACTED]

You can contact me at the number listed below should you need additional documentation or to discuss this claim.

Thank you for your anticipated cooperation.

Vehicle Valuation Methodology Explanation

WorkCenter Total Loss was built through a joint partnership between J.D. Power and Associates vehicle valuation division Power Information Network (P.I.N.) and Mitchell International, a leading provider of claims processing solutions to private passenger insurers.

WorkCenter Total Loss produces accurate and easy-to-understand vehicle valuations via this five step process:

Step 1 - Locate Comparable Vehicles

Locate vehicles similar to the loss vehicle in the same market area. WorkCenter Total Loss finds these vehicles in AutoTrader.com, Cars.com, Vast.com and directly from dealerships.

Step 2 - Adjust Comparable Vehicles

Make adjustments to the prices of the comparable vehicles. The comparable vehicles are identical to the loss vehicle except where adjustments are itemized. There are several types of comparable vehicle adjustments

- Projected Sold Adjustment - an adjustment to reflect consumer purchasing behavior (negotiating a different price than the listed price).
- Mileage Adjustment - an adjustment for differences in mileage between the comparable vehicle and the loss vehicle.
- Equipment- adjustments for differences in equipment between the comparable vehicle (e.g. equipment packages and options) and the loss vehicle.

Step 3 - Calculate Base Vehicle Value

The base vehicle value is calculated by averaging the adjusted prices of the comparable vehicles.

Step 4 - Calculate Loss Vehicle Adjustments

There are four types of loss vehicle adjustments:

- Condition Adjustment:
Adjustments to account for the condition of the loss vehicle prior to the loss.
- Prior Damage Adjustment:
Adjustments to account for any prior damage present on the loss vehicle prior to the loss.
- After Market Part Adjustment:
Adjustments to account for any after market parts present on the loss vehicle prior to the loss.
- Refurbishment Adjustment:
Adjustments to account for any refurbishment performed on the loss vehicle prior to the loss.

Step 5 - Calculate the Market Value

The Market Value is calculated by applying the loss vehicle adjustments to the base value.

2013 KIA FORTE**

REPORT

VEHICLE EXAMINED:

The vehicle examined was a 2013 Kia Forte with a VIN of KNAFT4A20 [REDACTED] and a stock number of [REDACTED]. This information was used to identify the vehicle.

LOCATION:

The vehicle was located at IAA [REDACTED] E Palmetto, FL. This was the same location at which the vehicle was to be examined.

PRELIMINARY:

As per your request, on 12/21/15 I traveled to Palmetto, FL and examined the above captioned vehicle. The purpose of this examination was to determine the origin and cause of the fire. Per information received from your office, on 08/17/15 while parked the vehicle caught fire.

It was reported to this office that the vehicle was parked at the time of the loss and no repairs or problems were reported at this time.

I was also informed that the insured had driven to his doctor's office and parked for approximately 15 minutes prior to the fire. Estimated mileage at the time of the loss was approximately 36,000 miles and the insured had purchased the vehicle used in October 2014 and at that time the vehicle had approximately 25,000 miles.

The claims representative informed this office that he had informed Kia Motors of the date and time of this scheduled examination and if no one was present at the scheduled time and date to proceed with the examination. At the time of my arrival at the IAA facility no other parties were present and the examination proceeded as scheduled with no other parties present.

Upon my arrival I was directed to the vehicle by IAA personnel. The vehicle was noted to be wrapped to protect it from the elements. I was informed by IAA personnel that the vehicle would be re-wrapped at the conclusion of this examination.

[REDACTED]

RECALL CHECK:

Per the NHTSA there were no recalls listed for 2013 Kia Forte vehicles at the time of this examination.

EXTERIOR EXAMINATION:

An examination of the exterior of the vehicle revealed fire damage incurred to the driver's side area of the windshield. The windshield was fractured; however, the windshield laminate remained in place. No other indicators of exterior fire damage were noted.

The overall condition of the vehicle was found to be good with no indicators of collision or impact type damage found.

All remaining window glass was found to be intact and it was noted that the left front window was partially open.

Examination of the wheels and tires revealed no indicators of fire related damage and all of the tires were inflated at the time of this examination.

ENGINE COMPARTMENT:

An examination of the engine compartment revealed no indicators of fire related damage. All components appeared to be OEM applications and there were no indicators of modifications found.

INTERIOR EXAMINATION:

An examination of the passenger compartment revealed an isolated area of direct fire damage located within the left upper dash area. The fire extended from this area into the left A pillar cover, left sun visor and into the headliner. The headliner material remained relatively intact and affixed to the roof.

The remainder of the passenger compartment was found to be in relatively good condition with varying degrees of carbon smoke damage found throughout.

Minor drop down was also noted within the left front floor area consistent with internal dash fire involvement.

All components appeared to be OEM applications with no indicators of aftermarket items or modifications noted. Also at the time of this examination there were no accessory power / charging cords found, such as cell phone, laptop or GPS type devices.

Further examination of the left upper dash area revealed that a portion of the upper dash cover was consumed by fire in the area just above the IPC. As previously stated the left A pillar cover was also severely fire damaged; however, the wiring harness routed throughout this A pillar cavity was relatively intact.

In order to properly document the area of origin a portion of the windshield laminate was removed for this examination. Upon removal of a portion of laminate approximately 13 x 10 inches in size, the left upper dash area and interior dash cavity could be visibly examined. This examination revealed moderate to severe levels of fire damage with burn patterns consistent with the fire having originated within the dash cavity at an area at or surrounding the upper dash support brace. Located within this area were several wiring harnesses, the IPC and multiple electrical components. It was found that during the progression of the fire melted drop down plastics were now adhered to several of the harness areas precluding a complete and thorough examination without the use of destructive testing. Portions of the main harness visible revealed indicators consistent with external fire exposure only as internal wire insulation was visible. However, as stated this harness was not manipulated or disassembled at this time.

One of the IPC harnesses which contained multiple conductors was found to be moderately fire damaged with its insulation consumed by fire. No indicators of unwanted electrical activity were noted visibly to this harness portion.

Further examination revealed what appeared to be the remains of a relay and / or module which was resting in the area of the upper dash support brace. This component was severely fire damaged as were the corresponding conductors. One of the conductors appeared to be partially terminated and it was noted that heavy oxidation was present. This component assembly along with its corresponding wiring were found to be in a fragile state meaning that manipulation would compromise the integrity of the component at this time. It should be noted that this component and its corresponding wiring is within the area of origin of the fire.

During this examination I was in contact with the claims representative from Progressive Insurance, who was informed of the findings of this examination in regards to preservation of the evidence found due to the fragile nature of the components involved. It was agreed upon at this time that no further destructive testing would be performed without additional opportunity for all interested parties to be present.

CONCLUSION:

ORIGIN:

Based on this examination, the burn patterns observed, along with my training and experience it has been determined that the fire originated within the passenger compartment. The area of origin at this time was narrowed down to the left area of the dash within the dash cavity at an area just forward of the IPC and above the upper dash support brace. This is the area in which the remains of a relay or module and corresponding wiring were located.

CAUSE:

Based on this non-destructive examination, the burn patterns observed, along with the circumstances involved, it has been determined that further destructive testing would need to be performed with all interested parties present in order to come to a clearer conclusion in this case. However, strong indicators were found consistent with a vehicle related electrical concern having been the contributing factor in the fire. During this examination no indicators of introduced components, items or modifications were noted.

Should further information become available after the completion of this examination that may be pertinent to this file, please forward it to our office for review and possible further action. Should you have any further questions in reference to this file, please do not hesitate to contact our office at your earliest convenience.
