133382 Read codes. Found 1 active clutch control code and 2 inactive clutch codes. Troubleshoot the 27 code as active as it had the most counts, plus it was active when I started. Got a no fault found conclusion twice. Suspected a bad CVU valve. Put in eservice case, 1-2850471171. Road tested with a loaded trailer to get code active. Was able to briefly get code active. Got response back from eservice. Installed a test CVU and calibrated the clutch. Road tested heavily with a loaded trailer, went good. Reported results of no fault this trip. Got ok for CVU replacement. Replaced the test cvu with new cvu. Calibrated the clutch and road tested again with a loaded trailer. No further issues. Cleared codes, all is well.
