Robert,

Thank you for your time today.

As of today we are on schedule to have our submission in on time.

Confirmation that the TSB referenced on the September 28, 2022 opening letter isn't our documents resolves one of my questions.

Relative to Section 10, that we will not be providing samples as discussed during our initial meeting and again today.

10. Produce one/two of each of the following:

- a. Exemplar sample of each design version of the subject component;*
- b. Field return sample of the subject component exhibiting the subject failure mode; and*
- c. Any kits that have been released, or developed, by VTNA for use in service repairs to the subject component/assembly which relate, or may relate, to the alleged defect in the subject vehicles.*

I will set up a follow up meeting for us next Tuesday, November 1 2022.
