

INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6)

Wondering if you saw my tweet to Chevrolet about my 18 month old 2019 Bolt burning. It was fully charged and parked for 20 minutes. It randomly started smoking from the rear. Still under warranty. I don't understand why you won't take over the investigation. People could get seriously hurt.

DMG! Have you consulted a lawyer? There are lawyers who deal specifically with car issues! We had to use one for our car about 10 years ago when our engine failed on a 2year old car. It wasn't a GM but still.

Chevrolet

He We did review your other posts and requested you contact us by DM on Twitter. To limit chances of miscommunication, we hope you continue working with us over Twitter.

Wow, this looks very bad, I think GM should take responsibility of their car, their name and reputation is on
