

New Vehicle Limited Warranty

GM will cover repairs to the vehicle during the warranty period in accordance with the following terms, conditions, and limitations.

Chevrolet Bolt EV

For vehicles sold in the United States, in addition to the Bumper-to-Bumper Coverage described previously, Chevrolet will warrant certain components for each Bolt EV for 8 years or 100,000 miles (160 000 kilometers), whichever comes first, from the original in-service date of the vehicle, against warrantable repairs to the specific electric propulsion components of the vehicle.

This warranty is for Chevrolet Bolt EV vehicles registered and normally operated in the United States or Canada, respectively. In addition to the initial owner of the vehicle, the coverage described in this Bolt EV warranty is transferable at no cost to any subsequent person(s) who assumes ownership of the vehicle within the 8 years or 100,000 miles (160 000 kilometers) term. No deductibles are associated with this warranty.

This warranty is in addition to the express conditions and warranties described in the 2017 Chevrolet Limited Warranty and Owner Assistance Information Booklet. The coverage and benefits described under "New Vehicle Limited Warranty" in the 2017 Chevrolet Limited Warranty and Owner Assistance Information Booklet are not extended or altered because of this special Hybrid Component Warranty.

What Is Covered

This warranty covers repairs to Hybrid specific component defect related to materials or workmanship occurring during the 8 years or 100,000 miles (160 000 kilometers) term for the following:

Towing

During the 8 years or 100,000 miles (160 000 kilometers) Hybrid warranty period, towing is covered to the nearest Chevrolet servicing dealer if your vehicle cannot be driven because of a warranted Hybrid specific defect. Contact the GM Roadside Assistance Center for towing. See [Roadside Assistance Program](#) for details.

Drive Motor Battery Coverage

Propulsion Battery Warranty Policy (Bolt EV)

Like all batteries, the amount of energy that the high voltage "propulsion" battery can store will decrease with time and miles driven. Depending on use, the battery may degrade as little as 10% to as much as 40% of capacity over the warranty period. If there are questions pertaining to battery capacity, a dealer service technician could determine if the vehicle is within parameters.

Repair (If Necessary)

Chevrolet has a network of certified dealers who are trained to perform repairs on Bolt EV if your vehicle needs battery service.

Replace (If Necessary)

If warranty repair requires replacement, the high voltage battery may be replaced with either a new or factory refurbished high voltage battery with an energy capacity (kWh storage) level at or within approximately 10% of that of the original battery at the time of warranty repair.

© 2020 General Motors. All rights reserved.

Your Electric Propulsion battery warranty replacement may not return your vehicle to an "as new" condition, but it will make your vehicle fully operational appropriate to its age and mileage.

Other Electric/Hybrid Components

High Voltage Wiring, Hybrid Powertrain and Battery Control Modules, Air Compressor Control Module, Accessory DC Power Control Module, High Voltage Battery Disconnect Control Module, Drive Motor Generator Power Invertor Module, Battery Charger Control Module.

Brakes

Brake Modulator Assembly

Electric/Hybrid Drive Unit

Electric drive unit assembly electric motors, and all internal components, including the auxiliary fluid pump, auxiliary pump controller, electric motor, and 3-phase cables.

What Is Not Covered

In addition to the "What is Not Covered" section of the 2017 Chevrolet Limited Warranty and Owner Assistance Information, the Chevrolet Bolt EV specific warranty does not cover the following items:

Wear Items

Wear items, such as brake linings, are not covered in the Chevrolet Bolt EV specific warranty.
