

## Software Upgrade: Knock Sensor Detection System

Hyundai, working in conjunction with one of the world's leading engineering and scientific consulting firms, has developed new engine monitoring technology called a "knock sensor detection system."

This software is designed to detect early signs of excessive main engine bearing and/or connecting rod bearing wear within the engine's rotating assembly, which is ordinarily associated with an engine knocking noise.

The system will detect a knocking noise and will then notify the driver via dashboard warning lights, as well as place the vehicle into a reduced power, engine protection mode. The vehicle should be taken to a Hyundai dealership immediately if the dashboard warning lights illuminate and the vehicle goes into engine protection mode.

This technology is now available for your vehicle at no cost to you. If you have not done so, please visit a Hyundai dealership to receive this software update.

## Lifetime Warranty

Hyundai is also providing limited lifetime warranty coverage for certain engine repairs for original and subsequent owners of the following vehicles, provided the software update on the previous page has been completed: 2011-2019 Sonatas, 2013-2018 Santa Fe Sports, 2019 Santa Fes, and 2014, 2015, 2018 and 2019 Tucson. The lifetime warranty covers the short block assembly, consisting of the engine block, crankshaft and main bearings, connecting rods and connecting rod bearings, and pistons when damaged due to connecting rod bearing failure.

Regular maintenance is essential to obtaining the highest level of performance, safety, and reliability from your Hyundai. It is especially important to routinely check your vehicle's engine oil level (once a month) and regularly replace the engine oil and oil filter (see your Owner's Manual to determine how often you should change your vehicle's oil and filter – at least every 7,500 miles under normal usage and every 5,000 miles under normal usage for turbo vehicles). Maintaining your vehicle according to the Owner's Manual is required to ensure that your warranty coverage remains intact. You should keep detailed records of vehicle maintenance, including date of service, mileage at time of service, and a description of service and/or parts installation performed. The scheduled maintenance log in this brochure can help you document this information. If you sell your vehicle, be sure to give your maintenance records to the new owner.

Hyundai will not deny a warranty claim solely because you do not have your records to show that you maintained your vehicle. However, damage or failure caused by an owner's neglect is not covered under warranty, including the lifetime warranty given by Hyundai in connection with the knock sensor software update described in this brochure.

In addition to the Lifetime Warranty, you may be eligible to receive compensation for future out-of-pocket expenses that are reasonably related to a connecting rod bearing failure or for related repair delays. Also, in the unlikely event you experience an engine compartment fire, you may qualify for compensation. Please refer to the settlement website ([HyundaiThetaEngineSettlement.com](http://HyundaiThetaEngineSettlement.com)) or call (800) 633-5151 for additional details on reimbursement eligibility and how to submit a claim.

If you opted out of the settlement, you will be excluded from future lifetime coverage for your vehicle. Also excluded from future lifetime coverage are individuals and commercial entities engaged in vehicle sales, leasing, financing, or renting of vehicles, including automobile dealers, leasing companies, automobile auction houses, vehicle brokers, banks, credit unions, or other lienholders. Prospective buyers wishing to confirm whether there is applicable engine warranty coverage should call (800) 633-5151.
