No worries. That's the VIN they're using and I can correlate to warranty to get the gate type. Not sure that the gate type is a major factor, but I'm on day 1 of this assignment and I'm not going to leave any rock unturned.

Best regards,

Ken Ryan

Ken,

Looking at DTP, they don't track by Base vs Step, they do have a Vehicle ID [REDACTED]

Not sure if that will tell you the type of Tailgate?

Thanks,

Mike

All models, and VOW is most applicable since it has the whole system. Do you have that data by tailgate (base vs step-gate)?

Ken,

No problem I can get that for you.

Do you need any specific model – 5.5 Ft Box, 6.5, etc? Or all models?

Also they take BIW and VOW – do you want both or just VOW?

Thanks,

Mike

Subject: P552 P558 Tailgate Data

Mike / John,

Hope you guys are doing well. I need some help getting flush and margin data on P552 & P558 tailgate from as far back as you can get me. Not sure you know, but NHTSA has opened up an investigation on unintended tailgate openings and ASO (Automotive Safety Office) has asked me to get involved.

If possible, can the data be in a form that can be put into MiniTab for analysis?

I really appreciate the help on this effort,

Ken Ryan

Ken,

Here are the PDF with nominals and spec's for the box.

Thanks,

Mike

Subject: RE: P552 P558 Tailgate Data

Mike,

I need to call you in the morning to make sure I understand the data sets and if I can use a common nominal for margin and flushness, and tolerances. Unfortunately, I don't have access to CM4D to the charts that I need, but with a quick conversation I can get this sorted out.

Also, I want to make sure the data is presented properly. I'll share any analysis with you guys before presenting to our management so we're aligned on conclusions and next steps.

Thanks for all your help,

Ken Ryan
