Thanks, Owen!

I have a meeting at 8am tomorrow that I need the tensioner design proposal presentation. That meeting is a status update meeting to our Chief engineers/Director to show the progress we are making on this investigation.

Please send that presentation to me as soon as possible.

Luke Brodbeck

Luke,

Attached is the presentation that was shared on the timing belt fabric alternative option. I haven't received the presentation on the timing belt tensioner yet.

As mentioned in the meeting, all 7 tensioners and 5 belts will be sent direct to our production location in Ivrea, Italy. From there, Federico can send the returned belts to our belt plant in Italy, which is located about 6 hours away.

The UPS tracking number for the shipment is [REDACTED]

Regards,
Owen
