Good morning Nitesh, how are you?

Is there a more recent updated version of this? If so, can you link me to it or send it? Thank you!

Jim Chascsa
Global Restraints Technical Leader
Ford Motor Company
Cell: 313-805-5896

Internal

Hello Ben,

When you have a minute, can you give me a call? We have all the parts lined up with the exception of the MGG's as a component. The supplier can ship direct to you, but we need some information from your shipping department in order to receive them. 248-766-5153

Thanks,
Joshua Ankrom

Hello Bob,

Sharing the two file that I discussed with you.

There are two assessments CCRG is seeking-
(1) NCAP assessment – with and without retractor pretensioner.
(2) 50^{th}/ 5^{th} % ile occupant inadvertent deployment- effect on customer.

I appreciate your support.

Best Regards,
Nitesh

Hello Kris,
Long time since we talked last. Hope all is well at your end.
CCRG team is seeking some help with the NCAP assessment related to subject topic.
In the past, Marwan helped us with the crash assessment for the regulatory modes.
There is a new request. I am not sure who is the Expedition/ Navigator Supervisor on your team. I will forward if you let me know.
I will provide the background and the request. I will appreciate your support.

Thank you,
Best Regards,
Nitesh

VOQ Customer Verbatims – Oct 25, 2023, search

#	ODI #	VIN #	Speed (as reported in VOQ)	Production Date	Incident Date	VOQ Date	Repair Date	Mileage	State	Customer Verbatim	Technician Comments
6	11536777	1FMJU1LT8KE[redacted]	0 mph	17-Mar-2019 (suspect time-window)	24-Jul-2023	14-Aug-2023	26-Jul-2023	70,564	FL	Were completely stopped at a red traffic. A loud shotgun or explosive sound filled the vehicle. I got hit with something in the chest that felt like a punch or a kick, knocking me out of breath. But my wife only heard the extremely loud noise. I was clutching my chest in pain as I thought I was shot. We smelled gun powder. My driver's seatbelt was stuck in the retracted position. Ford mechanic determined there was a factory short in the air bag circuit, which caused the seatbelt tensioner charge to explode. .....It turned out the kick in the chest was the seatbelt retracting 4 inches pulling me back in the seat.	Performed air bag diagnosis code b007e, ...Found drivers seat belt retractor deployed, checked for voltage on circuits cr188 and rr188, found 2.3 volts on circuit, traced harness for shorts, removed center console and disconnected air bag module, short to voltage disappeared, short in module caused pretensioner deployment...
7	11527614	1FMJK1KT6KE[redacted]	0 mph (default)	20-Feb-2019 (suspect time-window)	18-Jun-2023	26-Jun-2023	26-Jun-2023	53,015	FL	When turning into a parking lot and putting the brakes on, the explosive charge in the seat belt went off with painful compression of the chest by the seat belt in the drivers seat. The air bag did not inflate. I was able to get the seat belt off my chest, but it was fixed by the mechanism and would not extend for use after that.	Code b007e:13:8b rcm drivers seat belt pretensioner c deployment control. ...Install new retractor. .....Replaced left front seat belt retractor assembly. ....
8	11544664	1FMJU1LT8K[redacted]	0 mph	17-Mar-2019 (suspect time-window)	24-Jul-2023	25-Sep-2023	26-Jul-2023	70,564	FL	I reported this incident once already and since then 2 more 2019 For Expedition had the exact same issue. The seatbelt tensioner charge blew up for no reason while vehicle was stopped and running. This is a very dangerous problem as I almost heart attack, I thought I was shot. Please investigate this and don't wash it under the rug. To this day i'm afraid of driving my expedition fo fear of it happening again.

VOQ Customer Verbatims – Oct 25, 2023, search

#	ODI #	VIN #	Speed (as reported in VOQ)	Production Date	Incident Date	VOQ Date	Repair Date	Mileage	State	Customer Verbatim	Technician Comments
9	11538544	1FMJU1KT7KE[redacted]	0 mph	19-Oct-2018 (suspect time-window)	25-Jul-2023	21-Aug-2023		54,454	TX	The vehicle was parked when we heard a loud popping noise. I then saw white powder and smelled a horrible smell. Upon inspection the passenger seat side panel had popped open. It seemed like an airbag had deployed. I had a restraint indicator light on at that point. It was taken to a Ford dealership where they told me it couldn't have been an airbag it was just a faulty seatbelt sensor. Which by the way there was a recall for that exact thing on the 2020 but, not the 2019 so 750$ later.. they're going to fix it.	
10	11550493	1FMJU1HT9[redacted]	75-80 mph	15-Jan-2019 (suspect time-window)	13-Oct-2023	23-Oct-2023		72,000	AZ	The contact owns a 2019 Ford Expedition. The contact stated that while driving at approximately 75-80MPH, she heard a loud popping sound and noticed that the front driver's side seat belt had exploded. The contact stated that the front driver's side seat belt failed to retract. The air bag warning light illuminated. The vehicle was taken to the dealer where it was diagnosed that the seat belt pretensioner was faulty and needed to be replaced. The vehicle was repaired; however, the contact was then informed by the dealer that the failure might occur with the other seat belts. The contact was concerned for her safety while operating the vehicle. The manufacturer was notified of the failure, but no assistance was provided. The failure mileage was approximately 72,000.	

FCA-021 005281 RC

VOQ Customer Verbatims – Oct 25, 2023, search

#	ODI #	VIN #	Speed (as reported in VOQ)	Production Date	Incident Date	VOQ Date	Repair Date	Mileage	State	Customer Verbatim
11	11548577	1FMJU1KT4K[redacted]		18-Oct-2018 (suspect time-window)	06-Sep-2023	16-Oct-2023		72,000	TX	The contact owns a 2019 Ford Expedition. The contact stated that after the vehicle was shifted into park, the seat belt was removed, and the contact heard a loud popping sound then the front driver's side air bag inadvertently deployed. As a result of the failure, the seat belt retracted and burned the contact hand. No medical attention was required. The air bag warning light and the seat belt warning light illuminated. No medical attention was required. The vehicle was towed to the dealer where it was diagnosed that the seat belt retractor pretensioner failed and the seat belt retractor pretensioner and air bag needed to be replaced. The vehicle had not been repaired. The manufacturer was notified of the failure and a case was opened and the contact was advised to contact the NHTSA Hotline. The failure mileage was approximately 72,000.
12	11542745	1FMJ[redacted]							TX	Vehicle parked and had just been started. Went to put on dvr seatbelt and a loud explosion happened to my left and the seatbelt shoulder strap was pulled out of my fingers. The driver seatbelt pretensioner activated without a collision and the cab filled with smoke. Vehicle has never been in a collision, ever had a restraint malfunction, is the original OEM safety component, and hasn't been serviced/replaced for a seatbelt/airbag issue. Now, the air bag light is activated and the seatbelt is tightly fully retracted to the pillar so tight it can't be moved at all. Access to the onboard computer can verify all the above info. Dealership stated there was an activation of the pretensioned charge on the driver seatbelt resulting in the belt fully retracting and the seatbelt no longer functioning. 2nd 2019 Ford Expedition they have seen this week with the same mishap. If this would have deployed at highway speeds, a driver may have been startled due to the loud explosion in the cab and lost control of the vehicle (I was parked). Smoke immediately entered the occupant compartment. The seat belt retracted so quickly/tightly, injury to one's chest would have occurred.

Thanks Nitesh. For slide 8, could you use the legal template? Also, could you show some images of the PE that NHTSA issue highlighting why the investigation was closed? I think that will be relevant for the discussion.

Adrian

Hello Adrian & Dave,

Sending the draft version of the presentation we plan to discuss on Wednesday in the Awareness TRG.

Mauricio is working on the workplan that will be added to the deck. He said he will have it ready tonight. I will send his slides merged to the attached deck when I receive it.

Thank you,
Best Regards,
Nitesh

Hi Stacey,

It is the last presentation that we have regarding CCRG 21-576 U55x Inadvertent deployment,

Jim Chascsa is following up with the RCM team, ZF, and Daicel (initiator supplier) in order to set up the next set-up testing,

I will provide Martin and Susana access to the share point,

Thanks
Jesús
