

Hello, [REDACTED] This is Sarah for Chevrolet. I talked to the dealership. The part they are waiting on should be there Wednesday. They are still trying to diagnose the other issue but, so far, the vehicle is falling within normal parameters. I will continue to reach out to them. If you need anything else, please let me know. Otherwise, thank you for contacting Chevrolet and have a nice day.

Hmmm. I have two of these cars. My other one acts nothing like the one in the shop when it first starts the engine and you come to a stop sign.

I don't know what to say other than I'll keep you posted and I'd like to reach back out again via text on Wednesday with some updates and we can move from there. Is there anything else I can look into for you?

Thank you for touching base. I will talk with the shop more as they work through getting the part replaced. Best regards.
