CONCERN	-CUSTOMER STATES	Labor	\$0.00
---------	------------------	-------	--------

1. Confirmed issue and had to move into shop, scantested with GDS 2 and found code present. Active: P1E00-POAFA, history u2620-24. Tested Battery cell voltage and currently all show in spec range. setup ad called TAC 9-9218020841 and reviewed all info. TAC and testing shows replace the BECM then recheck battery cell parameters. A complete battery failure is not out of the picture but does not show as the fault at this time.

2. Disconnected high voltage system and 12v battery. removed battery and cover and replaced Battery Energy Control Module.

3. Assembled battery and installed, then reset high voltage and programmed BECM. filled and bleed coolant system for battery ,

4. Charged High voltage battery and tested. all passed. ROADTESTED all shows normal operation.

5. program code: CDYN152374095
