We experienced 6 1/2 months without a car when our Volt had a failure of it's Voltec system last October. Case number SR [REDACTED]. I am writing to report that the Voltec system in the Volt has again failed. It has been at Stevinson Chevrolet since June 21 due to another failure of the Voltec battery. Arrival of the new part is undetermined.

Since we have completely lost patience and confidence in this vehicle we would like to be contacted by someone within GM who has the ability to negotiate a buy back of the car. Our goal is to receive the full blue book used car price for a 2017 Volt in good condition with only 36,000 miles driven. We cannot continue without a reliable low mileage vehicle with only our RV as backup. This whole experience has been very stressful and anxiety producing.

I see it was [REDACTED] and that this case was resolved. May I ask if you would like me to create a new case and reach out to the dealer and may I ask if they said they have a back order on this part or not?

Tonya

|

04:30pm

I have been told by Stefanie that I need a new case number. A part is on order but there is no ETA at this point. You may reach out to Stevinson but they are not the issue for us. Last time it took several months to have any information on the arrival of the parts.

SMS User [REDACTED]

04:34pm

I can do that now. Lastly may I ask if you prefer chat email or phone contact and is there a best time of day to reach you?

We don't have a car because GM can't provide parts that are under warranty which are required for the car to function. We also don't know if the part will ever arrive and then it may not work for long. So we don't know if we will ever get the car back or when. This is totally unacceptable.
