

Request 10

Describe all assessments, analyses, tests, test results, studies, surveys, simulations, investigations, inquiries and/or evaluations (collectively, "actions") that relate to, or may relate to, the alleged defect in the subject vehicles that have been conducted, are being conducted, are planned, or are being planned by, or for, Ford. For each such action, provide the following information:

- a) Action title or identifier;
- b) The actual or planned start date;
- c) The actual or expected end date;
- d) Brief summary of the subject and objective of the action;
- e) Engineering group(s)/supplier(s) responsible for designing and for conducting the action;
- f) A brief summary of the findings and/or conclusions resulting from the action; and
- g) For each failed engine examined by Ford, provide a description of the findings, photos and/or videos, and a diagnosis or determination of the failed component and root cause.

For each action identified, provide copies of all documents related to the action, regardless of whether the documents are in interim, draft, or final form. Organize the documents chronologically by action.

Answer

Ford is construing this request broadly and is providing not only studies, surveys, and investigations related to the alleged defect, but also notes, correspondence, and other communications that were located pursuant to a diligent search for the requested information. Ford is providing the responsive non-confidential documentation in the folder titled "Non Confidential" within the "Request 10" folder.

To the extent that the information requested is available, it is included in the documents provided. If the agency should have questions concerning any of the documents, please advise.

Ford is submitting additional responsive documentation in the "Confidential" folder within the "Request 10" folder with a request for confidentiality in a separate file transfer to the agency's Office of the Chief Counsel pursuant to 49 CFR Part 512. Redacted copies of the confidential documents are also provided in the "Non Confidential" folder and are labeled "Public." In the interest of ensuring a timely and meaningful submission, Ford is not producing materials or items containing little or no substantive information. Examples of the types of materials not being produced are meeting notices, raw data lists (such as part numbers or VINs) without any analytical content, duplicate copies, non-responsive elements of responsive materials, and draft electronic files for which later versions of the materials are being submitted. Ford is not producing documents responsive to this request that are protected from disclosure by attorney-client privilege, work-product doctrine, or other applicable immunity. Documents protected from disclosure on these bases are described in a privilege log titled "EA23-002 Request 10 – Privilege Log."

In response to Request 10, subpart "g," Ford is providing the engine analysis log maintained by Engine Engineering in the file "EA23-002 Request 10 – Engine Engineering," in addition to images and videos contained in the "Confidential" and "Non Confidential" folders. Through

this method, Ford is seeking to provide the agency with substantive responsive materials in our possession in the timing set forth for our response. We believe our response meets this goal. If the agency would like additional materials, please advise.
