Re: Cruise LLC's Supplemental Production to NHTSA's November 27, 2023, Information Request in Preliminary Evaluation 23-018

Dear Ms. Yukevich:

On February 20, 2024, Cruise submitted its remaining responses, including its file production and supporting materials, to your November 27, 2023, Information Request (ID23018-02) relating to National Highway Traffic Safety Administration ("NHTSA" or the "Agency") Preliminary Evaluation 23-018. As communicated to the Agency via email on February 20, 2024, Cruise identified certain video files that were inadvertently not produced with the February 20, 2024 submission. In addition, Cruise has identified a limited set of documents in its possession that it has determined to be responsive to certain Requests in the Agency's Information Request. As a result, Cruise is providing a supplemental file production to include those video files and documents.

All document and video files in Cruise's supplemental file production constitute confidential business information and are exempt from public disclosure under the Freedom of Information Act (5 U.S.C. § 552(b)(4)) ("FOIA"). A request for confidential treatment is being provided with Cruise's supplemental production. Cruise has submitted the unredacted nonpublic copy of the documents and videos in its supplemental production via secure file transfer to the NHTSA Office of Defects Investigation.

Please contact me or Rachel Ross, Senior Counsel, Regulatory and Compliance, at rachel.ross@getcruise.com, if you require further information about Cruise's supplemental production.
