

20250422 Meeting to Catch Up with TMC

Tuesday, April 22, 2025 7:05 AM

Thor's current position:

Low failure rate

Overloading

Waiting for updates from [REDACTED] info to see if there was anything different

SAE council no update either

Update testing will be next steps

No written guidance for drop hitch, etc.

No field action planned

Discussion points:

Who should provide guidance on RV towing?

RVIA, but probably the RV manufacturer in the end

Discuss further with RVIA for industry education

Need to be some future manufacturing changes to account for vehicles and trailers increasing in size (weight)

David will get Thor's education plans drawn up in a couple of weeks, RVIA plans probably mid-June
