

Request 16:

16. Describe the towing option(s) that are available to the owners for which the hitch receiver is installed as original equipment on the subject vehicle by Thor at the time of vehicle manufacture. Include a description of other towing related accessories included in the package. Provide a copy of the owner manual towing section(s) and other available towing literature that are provided to an owner of an OEM hitch receiver equipped vehicle and any other material that is available to the owner (on request or purchase) concerning towing limits and guides. If the material differs for GVWR groupings, please specify. Describe any customer restrictions for the subject components, such as draw bars, load distribution equipment, adjustable tow bars, drop hitches, etc.

Response:

TMC does not offer towing option packages on the subject or peer vehicles. However, each motorhome has a hitch receiver that allows an owner to tow a trailer, a vehicle or to utilize a hitch-mounted cargo or bicycle carrier.

Owner's Manual sections dealing with Weighing, Loading and Towing from MY 2014-MY 2024 are provided in Appendix 1.

In addition, TMC has an online instructional video on YouTube going over the proper way to load and tow with your RV. That video can be found at:
