

Request 1:

1. State, by model and model year, the number of subject vehicles and peer vehicles Thor has manufactured for sale or lease in the United States. Separately, for each subject and peer vehicle manufactured to date by Thor, state the following:

- a. Vehicle identification number (17-character VIN);
- b. Make;
- c. Model;
- d. Model Year;
- e. Floorplan, specifically the length of the motorhome;
- f. Subject component part numbers and design version installed as original equipment;
- g. Gross Vehicle Weight Rating (GVWR);
- h. Front Gross Axle Weight Rating (GAWR);
- i. Rear Gross Axle Weight Rating (GAWR);
- j. Unloaded Vehicle Weight (UVW);
- k. Occupant and Cargo Carrying Capacity (OCCC);
- l. Towing capacity of the motorhome;
- m. Tongue weight capacity of the motorhome;
- n. Gross Combined Weight Rating (GCWR);
- o. Dimensional detail of the hitch location in relation to the rear axle;
- p. Height of the receiver from the ground;
- q. Towing capacity of the hitch receiver;
- r. Tongue weight capacity of the hitch receiver;
- s. Date of motorhome manufacture (MM/DD/YYYY);
- t. Date warranty coverage commenced (MM/DD/YYYY); and
- u. The State in the United States where the vehicle was originally sold or leased, or delivered for sale or lease (postal abbreviation).

Provide the table in Microsoft Excel, or a compatible format, entitled "PRODUCTION DATA." A pre-formatted data collection file, which provides further details regarding this submission, can be provided to you.

Response:

The maximum towing capacity column in the PRODUCTION DATA file has been left blank. The maximum towing capacity for each vehicle is different dependent upon the weight of the fully loaded motorhome at the time it is ready to tow. There are two ways to determine the maximum towing capacity of the motorhome:

- 1) If the weight of the motorhome and towed items do not exceed the GCWR, then the towing capacity is equal to the maximum hitch rating of 8,000 pounds,
- 2) If the weight of the motorhome and towed items exceed the GCWR, then the towing capacity is the GCWR minus the weight of the motorhome.

The requested information is included in the file entitled PRODUCTION DATA.
