VALUATION METHODOLOGY

How was the valuation determined?

CLAIM INSPECTION

WEST BEND MUTUAL INSURANCE COMPANY has provided CCC with the zip code where the loss vehicle is garaged, loss vehicle VIN, mileage, equipment, as well as loss vehicle condition, which is used to assist in determining the value of the loss vehicle.

DATABASE REVIEW

CCC maintains an extensive database of vehicles that currently are or recently were available for sale in the U.S. This database includes vehicles that CCC employees have physically inspected, as well as vehicles advertised for sale by dealerships or private parties. All of these sources are updated regularly.

SEARCH FOR COMPARABLES

When a valuation is created the database is searched and comparable vehicles in the area are selected. The zip code where the loss vehicle is garaged determines the starting point for the search. Comparable vehicles are similar to the loss vehicle based on relevant factors.

CALCULATE BASE VEHICLE VALUE

Adjustments to the price of the selected comparable vehicles are made to reflect differences in vehicle attributes, including mileage and options. Dollar adjustments are based upon market research.

Finally, the Base Vehicle Value is the weighted average of the adjusted values of the comparable vehicles based on the following factors:

- Source of the data (such as inspected versus advertised)
- Similarity (such as equipment, mileage, and year)
- Proximity to the loss vehicle's primary garage location
- Recency of information

WEST BEND MUTUAL INSURANCE COMPANY uses condition inspection guidelines to determine the condition of key components of the loss vehicle prior to the loss. The guidelines describe physical characteristics for these key components, for the condition selected based upon age. Inspection Notes reflect observations from the appraiser regarding the loss vehicle's condition.

CCC makes dollar adjustments that reflect the impact the reported condition has on the value of the loss vehicle as compared to Average Private condition. These dollar adjustments are based upon interviews with dealerships across the United States.

Comparable vehicles used in the determination of the Base Vehicle Value are not intended to be replacement vehicles but are reflective of the market value, and may no longer be available for sale.

List Price is the sticker price of an inspected dealer vehicle and the advertised price for the advertised vehicle.

Take Price is the amount that the dealership will accept to sell the inspected vehicle, though a lower price may be obtainable through negotiation.

Distance is based upon a straight line between loss and comparable vehicle locations.

Adjusted Comparable Value represents the price of the comparable vehicle with adjustments for options, mileage, condition, and year/model/trim as compared to the loss vehicle.

A condition adjustment is also made to set the comparable vehicle to Average Private condition, which the loss vehicle is also compared to in the Vehicle Condition section.
