This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Ford Motor Company has decided that a defect which relates to motor vehicle safety exists in your vehicle with the VIN shown above.

|---|--|
| What is the issue? | The power steering pressure line in your vehicles may be inadequately connected to the brake Hydroboost unit, which may result in a leak or sudden loss of power steering fluid. |
| What is the risk? | Sudden loss of power steering fluid may result in a loss of power steering assist, requiring increased steering effort, and loss of power brake assist, requiring increased force on the pedal to brake, potentially resulting in increased stopping distance. A sudden loss of power steering assist and power brake assist increases the risk of a crash. |
| What will Ford and your dealer do? | Ford Motor Company has authorized your dealer to inspect the power steering pressure lines at the quick-connect fitting and if necessary, replace the lines, free of charge (parts and labor). |
| How long will it take? | The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time. Additional time may be required to allow the engine to cool prior to performing this repair. In addition, your vehicle will require an inspection to determine if parts need to be ordered. |
| What should you do? | Please call your dealer without delay and request a service date for Recall 22S08. Provide the dealer with your VIN, which is printed near your name at the beginning of this letter. |

Please see your dealer for guidelines and limitations.
