We need a meeting, include Jeremy Willard, Bill O, and Mike L on the call so FCSD is aligned. Then whoever from BCM and PCM and DSP who will support the service trial.

Subject: RE: 2024 1.5L & 2.0L BRONCO SPORT NEEDED TO SUPPORT SW TRIAL

Hi,

Sorry, I'm confused here.

Do these two VINs not have a BCM update?

(MY24 CX430) Vehicle left EOL with the latest and greatest BCM software. LU5T-14B476-HJC assembly. No update is offered because it is not needed.

(MY23 CX430) Vehicle left EOL with the latest and greatest BCM software. LU5T-14B476-CJC assembly. No update is offered because it is not needed.

Above says no update is offered, but then statement says:

(MY24 CX430) – has an update available and visible on FDRS.

Both of these VINs have this recall open on them. How can they not have an update required to satisfy this recall? Did the recall update go in at the plant and the VINs in the recall have a population already containing the BCM update? If so we need to know when and capture this in the dealer bulletin with a build date cut off.

Subject: RE: 2024 1.5L & 2.0L BRONCO SPORT NEEDED TO SUPPORT SW TRIAL

Hi Mike,
I should probably limit my comments to PCM as that is my area of expertise/responsibility.

VIN [REDACTED] has a PCM assembly of R1PA-12A650-DA. This is the latest available assembly in SRV0003153,A. A later service action, SRV0003153,B was frozen earlier this week. It contains a later calibration R1PA-12A650-DB, but is not yet available to the field. SRV0003153,B should roll to GIVIS over the weekend, and flash action for VIN [REDACTED] should reflect R1PA-12A650-DB by Monday morning.

The situation is similar with VIN [REDACTED]. The current PCM assembly, R1PA-12A650-AC, is the latest in SRV0003152,A. A later revision, SRV0003152,B contains a later calibration, R1PA-12A650-AD. SRV0003152,B was frozen earlier today and will likewise roll to GIVIS over the weekend. PCM flash action should reflect R1PA-12A650-AD by Monday morning.

Both [REDACTED] and [REDACTED] currently show no flash action available. Both currently have PCM assembly, R1PA-12A650-HA is the latest in SRV0003152,A. A later assembly R1PA-12A650-HB is in SRV0003152,B, which, as mentioned above, should roll to GIVIS over the weekend. The flash action containing R1PA-12A650-HB should show up for both VINs by Monday morning.

Subject: RE: 2024 1.5L & 2.0L BRONCO SPORT NEEDED TO SUPPORT SW TRIAL

Hi Adam,

I understand the urgency. I don't believe expediting a service trial for 1 of the needed vehicles tomorrow isn't going to gain us any time. Service trials are necessary on the other software variants yet to be released. Normally, we do one service trail on all variants at the same time, rather than gather all the necessary people for a service trial multiple

times. I'd also prefer to have my analyst present who is tasked with authoring the documents and validating the service procedure.

I also thought this gave Patrick additional time to locate another vehicle needed for the trial? We need a 1.5L and 2.0L 2024 Bronco Sport correct? Also a Maverick.

Subject: RE: 2024 1.5L & 2.0L BRONCO SPORT NEEDED TO SUPPORT SW TRIAL

That is perfect Patrick, appreciate the assistance!

As below VIN is a 1.5L, do you by chance have a 2.0L 2024MY Bronco sport we can utilize for trial?

@Osepchook, William (W.R.) & @Johnston, Steven (S.J.) – Can you please coordinate trial and vehicle with Patrick in Jeremy's absence?

Best Regards,

[REDACTED]

I can get this 2024 Bronco Sport Friday. Will it fit your needs?

Subject: 2024 1.5L & 2.0L BRONCO SPORT NEEDED TO SUPPORT SW TRIAL

Importance: High

Hi Patrick, Baileigh, and Karen,

I'm trying to help FCSD locate a 2024 Bronco Sport (1.5L & 2.0L) to support a service trial to validate software to support a recall. Can you please let me know if there is any vehicles in your fleet that could support trial? The trial will be to flash new BCM and PCM software on vehicle to ensure software functions as intended using service tool that our dealers will use to complete update. The team could but original software if desired back onto vehicle upon return. Your assistance would be appreciated!

Best Regards,

Mike Landt
