Answer

Records identified in a search of Ford's warranty database were reviewed for relevance and sorted in accordance with the categories described in the following table.

Category	Definition
A1	Allegation of inadvertent deployment of seatbelt retractor pretensioner
A2	Potential inadvertent deployment of seatbelt retractor pretensioner

The number of warranty claims identified in this search that relate to the categories above in subject or peer vehicles are provided below.

Vehicle	Category	Number of Claims
Subject Vehicles	A1	4
	A2	3
Peer Vehicles	A1	4
	A2	0

When Ford was able to identify that duplicate claims for an alleged incident were received, each of these duplicate claims was marked accordingly and the group counted as one report. In other cases, certain vehicles may have experienced more than one incident and have more than one claim associated with their VINs. These claims have been counted separately.

Requests for "goodwill, field, or zone adjustments" received by Ford to date that relate to the alleged defect that were not honored, if any, would be included in the GCCT reports identified in response to Request 2. Such claims that were honored are included in the warranty data provided. Ford assumes that providing the warranty claims in the electronic database format meets the requirements of this request as the agency can review or order the claims as desired.

Copies of relevant warranty claims identified in this search that allege the defect in a subject or peer vehicle are provided in the document "RQ24-015 Request 5 - Warranty Data." The categorization of each report is identified in the "Category" field.
