Mr. Peter Kivett, Chief
 Vehicle Defect Division C
 Office of Defects Investigation
 National Highway Traffic Safety Administration
 1200 New Jersey Avenue SE, W45-302
 Washington, DC 20590

Dear Mr. Kivett:

Subject: PE24019 Low Pressure Fuel Pump Failure

Pursuant to our discussion on August 27, 2024, Ford Motor Company (Ford) is requesting a partial extension of time to respond to the Office of Defects Investigation (ODI) Information Request Letter for PE24019 dated August 5, 2024. The original due date for Ford’s response to Part 1 of Information Request Letter PE24019 is September 9, 2024.

Ford’s request for an extension is only for Part 1 and is outlined in the table below. Ford intends to submit its response for Part 2 by September 23, 2024, as specified in the PE24019 Information Request Letter.

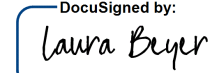

NHTSA Investigation	Information Request Question #	Original Due Date	Requested Extension Due Date
PE24019	Part 1, Q1	September 9, 2024	September 23, 2024
	Part 1, Q2	September 9, 2024	September 23, 2024
	Part 1, Q3	September 9, 2024	September 23, 2024
	Part 1, Q4	September 9, 2024	September 23, 2024
	Part 1, Q5	September 9, 2024	September 23, 2024
	Part 1, Q6	September 9, 2024	September 23, 2024
	Part 1, Q7	September 9, 2024	September 23, 2024
	Part 1, Q8	September 9, 2024	September 23, 2024
	Part 1, Q9	September 9, 2024	September 23, 2024

As we discussed, the “low pressure fuel pump” is identified as the subject component in PE24019. Ford understands this to mean the low pressure fuel pump system. Specifically, the low pressure fuel pump and the jet pump within the Fuel Delivery Module (FDM) in the

fuel tank. Therefore, Ford's response will be inclusive of peer vehicles that include a substantially similar fuel pump and jet pump, within the FDM, to those in the subject vehicles.

If you have any questions concerning this request, please feel free to contact me.

Sincerely,

DocuSigned by:
