<p>Battery was dead upon inspection, tested battery, battery tested bad, replaced battery to begin diagnostic. Verified engine does not start, drained engine oil and found metal flakes in oil, removed engine assembly and tore down for point of failure. After tear down, found cylinder 1 and 2 connecting rod bearings spun and welded together, causing engine to lock up. Performed cost comparison. Rebuild exceeded engine replacement. Once recieved, installed new engine assembly, filled to factory specification on coolant and engine oil. Performed engine prelube, started engine and allowed vehicle to reach operating temperature. Checked for DTCs, cleared dtcs and road tested vehicle. Road test ok. Technician is requesting 8.0 OLH for engine tear down and reassembly. 18.1 hours to replace engine, 1.0 diagnostic, 8.0 OLH, Totaling 27.1 hours OLD #T1232069L92X0946 NEW #N1201831CU8X0265</p> <p>*****</p> <p>B MULTI POINT VEHICLE INSPECTION.
