TITLE:

BEV8YPS Guide & Part List

GROUP: 00	NO: 055P	ISSUING DEPARTMENT:	CAR MARKET: United States and Canada	
REVISIONS:			ISSUE DATE: 2024-10-29	STATUS DATE: 2024-10-29
			Page 1 of 4	

Purpose

Polestar electric vehicles, Polestar 2 and Polestar 3, include a 8-year 100,000 mile (160,000 kilometers) warranty on the High Voltage battery and electric motors. The exact language of this warranty can be found in the Status and Warranty booklet included in every Polestar. All model year booklets are also available to purchase through Nebula (Menu -> Applications -> Polestar Tech Hub)

BEV8YPS is the claim type for this warranty.

This bulletin contains clarifications to questions the warranty team has received and is not to replace information included in the Status and Warranty booklet.

Polestar 1 is a Plug-in Hybrid Electric Vehicle (PHEV) and is not included in the scope of this bulletin.

High Voltage System Coverage

As outlined in the Model Year (MY) 2021 through 2025 Status and Warranty Booklets for Polestar 2 & 3, the following components are covered under this warranty:

- High Voltage Battery
- Battery Energy Control Module (BECM)
- Combined Voltage & Temperature Node (CVTN)
- Battery Disconnect Unit (BDU)
- High Voltage Battery Module
- Electric Front Axle Drive (EFAD)
- Electric Rear Axle Drive (ERAD)

Effectively, the High Voltage battery itself and internal components are covered, as well as the front and rear motors. Parts that are not listed above are not necessarily covered.

Service Manager Bulletin 00-055P

As of MY2025, batteries are also subject to wear and tear coverage for the length of this warranty. If the battery capacity is lower than 70% of the original status (according to specification) at 8 years or 100,000 miles/160,000 kilometers, whichever occurs first, the battery will be replaced free of charge.

The manual also makes clear that the battery may be replaced with a reconditioned unit with the same or better capacity as before the problem occurred.

Components not listed above, such as On Board Charger (OBC) or High Voltage Coolant Heater (HVCH) are not listed in the customer information for Polestar 2 & 3 at the time of this publication and therefore are not covered under this warranty unless damaged as the result of a covered component failure.

Claiming Supporting Parts

Supporting parts and parts damaged by a failure in a covered component may require the claim to be split into 2 separate claims. One claim for the covered component & labor under BEV8YPS, and one claim for the parts and labor that were necessary to use to complete the work and did not fall within the BEV8PS list.

This second claim should be claimed under the base warranty (0112PS or 0148PS) or Certified Pre-Owned (CPOWPS) warranty if still valid.

If those warranties have expired but BEV8YPS is still active, please apply for Technical Goodwill (05PS) through Nebula for coverage of additional needed components. **NOTE:** This is not a blanket goodwill instruction for non-covered components, only instruction for goodwill to cover components needed to replace BEV8YPS parts or subsequently damaged components.

BEV8YPS Parts list

The parts listed below are covered under BEV8YPS. This list is not exhaustive and may be superseded at any time. Please use it as a guide to begin claiming. If you have any questions, please reach out to Warranty Support through Nebula.
