DISCLAIMER OF WARRANTIES
 Any warranties on the products sold hereby
 are those made by the manufacturer or third
 party administrator. The Seller, MARKLEY
 MOTORS, INC. hereby expressly DISCLAIMS
 all warranties, either express or implied,
 including any implied warranty of
 merchantability or fitness for a particular
 purpose, and MARKLEY MOTORS, INC. neither
 assumes nor authorizes any other person to
 assume for it any liability in connection with
 the sale of said products.

REPAIR ORDER NOTICE
 Colorado law provides from imposition of a
 lien in favor of any person who repairs or
 bestows labor on personal property such as
 motor vehicles. If the repair or service work
 authorized in this Repair Order is not paid for,
 or is paid with a check, draft, or order which is
 subsequently dishonored for any reason, or is
 charged to an account which is not paid when
 due, the law gives the motor vehicle repair
 garage the right to take possession of the
 motor vehicle and/or commence an action in
 court to foreclose the lien which may result in
 the vehicle being sold pursuant to court order.

SERVICE PARTS WARRANTY

All estimates are good for 30 days from time of estimate. Taxes and other fees are subject to change. 2% Fee on Transactions Paid with Credit Card

Reasons for the Recommendation

Replace Your Cabin Air Filter

What does this do?

A filter that sends clean air into the vehicle's heat and air conditioning system.

Why is this necessary?

The cabin air filter is responsible for filtering air from outside of the vehicle, to the inside. This filter traps dust, pollen, and other fine debris, providing better quality air to you and your passengers. A dirty or clogged filter can limit air flow, putting strain on your climate system. A dirty filter left unchanged can introduce a dusty, dirty, or musty smell to your interior.

Example - Not Actual Part

Replace Your Engine Air Filter

What does this do?

A filter that keeps out dust and debris and sends clean air to your engine intake.

Why is this necessary?

The engine air filter is responsible for keeping dust and debris from entering your engine's intake. A dirty or clogged air filter will restrict the amount of air entering your engine. This can cause a decrease in fuel mileage, reduced horsepower, and possible misfiring. A missing air filter can allow dust, rain, and other debris, like leaves and insects, to enter your engine and damage internal components.

Example - Not Actual Part

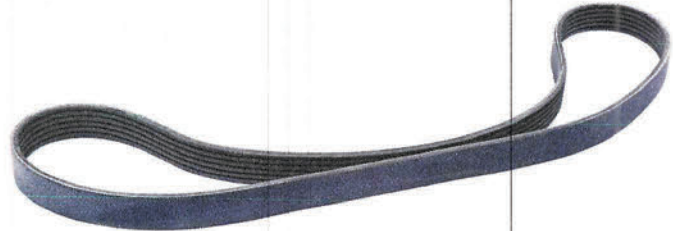

Replace Your Serpentine/Drive Belt(s)

What does this do?

A grooved belt that transfers engine power to multiple vehicle systems.

Why is this necessary?

A serpentine or drive belt provides power to systems such as your air conditioning, alternator, power steering, and/or cooling system. This critical part allows these systems to operate. A worn belt may squeal, or slip. When it does this it is unable to provide the proper power to vital components. A damaged or failed belt can lead to engine overheating, loss of power steering, or cause your air conditioning system to be inoperable. Belts should be immediately replaced if there are any visible signs of wear such as cracks, abrasions, or damaged ribs.

Example - Not Actual Part

Flush Your Hydraulic Brake System

What does this do?

A service that replaces dirty and contaminated brake fluid with fresh and clean fluid to provide the best performance for stopping your vehicle.

Why is this necessary?

Your brake fluid builds up with contaminants and excess moisture from being used, which cause it to break down and become ineffective. As the fluid breaks down it can begin to damage rubber seals and cause rust to form in your brake system. Dirty brake fluid can't provide the right amount of pressure to stop your vehicle, endangering your safety. Replacing this contaminated fluid with new brake fluid will help make sure your vehicle can stop safely and will increase the lifespan of other components of your brake system.
