Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

**Reason For This Recall:** General Motors has decided that a defect that relates to motor vehicle safety exists in certain 2000 Chevrolet Silverado, Tahoe, and Suburbans; and GMC Sierra, Yukon, and Yukon XLs. Some of these vehicles have an air bag sensing diagnostic module that contains an anomaly that could result in the driver and passenger's air bag failing to deploy during certain frontal collisions. In a vehicle crash, front seat occupants may receive more severe injuries.

**What Will Be Done:** Your GM dealer will reprogram the air bag sensing diagnostic module. This service will be performed for you at **no charge**.

**How Long Will The Repair Take?** The length of time required to perform this service correction is approximately fifteen minutes. Additional time may be required to schedule and process your vehicle. If your dealer has a large number of vehicles awaiting service, this additional time may be significant. Please ask your dealer if you wish to know how much additional time will be needed to schedule, process and repair your vehicle.

**Contacting Your Dealer:** Please contact your dealer as soon as possible to arrange a service date. Instructions for making this correction have been sent to your dealer. Your dealer is best equipped to obtain parts and provide services to correct your vehicle as promptly as possible.
