

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Reason For This Recall: General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2003 model year Chevrolet TrailBlazer, GMC Envoy, and Oldsmobile Bravada vehicles. On some of these vehicles, the front left brake pipe may have been scored during manufacturing. The brake pipe may lose strength at the score location due to corrosion and fatigue resulting from brake fluid pressure, vibration, and temperature changes. As a result of this, the brake pipe may eventually fracture at the score location. If the brake pipe were to fracture, brake pedal travel would be increased and front brake performance would be reduced. In these instances, braking would be limited to that available with the remaining half system (rear brakes).

In all of the above cases, the brake light would illuminate after sufficient fluid leaked out of the system to activate the low fluid level switch in the master cylinder reservoir.

What Will Be Done: Your GM dealer will inspect the front left brake pipe and replace it, if necessary. This service will be performed for you at no charge.

How Long Will It Take? This service correction will take approximately 50 minutes. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

Contacting Your Dealer: Please contact your dealer as soon as possible to arrange a service date. Parts are available and instructions for making this correction have been sent to your dealer. Your dealer is best equipped to obtain parts and provide services to correct your vehicle as promptly as possible. Should your dealer be unable to schedule a service date within a reasonable time, you should contact the appropriate Customer Assistance Center at the listed number below:
