Safety Defect and Noncompliance Report Guide for Vehicles
PART 573 Defect and Noncompliance Responsibility and Reports¹

On _____, 2004, _____ [MFR] decided that (a defect which relates to motor vehicle safety)(a noncompliance with Federal Motor Vehicle Safety Standard No. _____) exists in the motor vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Responsibility and Reports.

Date this report was prepared: 4/6/04

Furnish the manufacturer's identification code for this recall (if applicable): 48X

1. Identify the full corporate name of the fabricating manufacturer of the vehicle being recalled. If the recalled vehicle is imported, provide the name and mailing address of the designated agent as prescribed by 49 U.S.C. §30164.

TRAVIS BODY & TRAILER, INC
13955 FM 529 HOUSTON, TX 77041

Identify the corporate official, by name and title, whom the agency should contact with respect to this recall.

JASON BACKS, VP

Telephone Number: 713-466-5888 Fax No.: 713-466-3238

Name and Title of Person who prepared this report:
JASON BACKS, VP

Signed:  VP 4/6/04

¹ Each manufacturer must furnish a report, to the Associate Administrator for Safety Assurance, for each defect or noncompliance condition which relates to motor vehicle safety.

I. Identify the Vehicle Models Involved in the Recall

2. Identify the Vehicles Involved in the Recall, for each make and model or applicable vehicle line (provide illustrations or photographs as necessary to describe the vehicle), provide:

Make(s): _____ **Model Years Involved:** 97-98 **Model(s):** FWD DUMPS

Production Dates: Beginning: _____ **Ending:** _____

VIN Range: Beginning: 7000 **Ending:** 7999

Vehicle Type: TRAILER **Bodystyle:** FWD DUMP

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

NONE SEE LIST FOR COMPLETE DETAILS

Make(s): _____ **Model Years Involved:** _____ **Model(s):** _____

Production Dates: Beginning: _____ **Ending:** _____

VIN Range: Beginning: _____ **Ending:** _____

Vehicle Type: _____ **Bodystyle:** _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Make(s): _____ **Model Years Involved:** _____ **Model(s):** _____

Production Dates: Beginning: _____ **Ending:** _____

VIN Range: Beginning: _____ **Ending:** _____

Vehicle Type: _____ **Bodystyle:** _____

Descriptive information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

Identify the approximate percentage of the production of all the recalled models manufactured by your company between the inclusive dates of manufacture provided above, that the recalled model population represents. For example, if the recall involved Widgets equipped with certain items of equipment from January 1, 1996 through April 1, 1997, then what was the percentage of the recalled Widgets of all Widgets manufactured during that time period.

II. Identify the Recall Population

3. Furnish the total number of vehicles recalled potentially containing the defect or noncompliance.

<u>Vehicles</u> <u>Model</u>	<u>Year</u>	<u>Number of</u> <u>Potentially</u>
---------------------------------	-------------	--

Involved

<u>END DUMPS</u>	<u>97-99</u>	<u>453</u>
------------------	--------------	------------

Total Number Potentially Affected by the
Recall: 453

4. Furnish the approximate percentage of the total number of vehicles estimated to actually contain the defect or noncompliance:

Identify and describe how the recall population was determined—in particular how the recalled models were selected and the basis for the beginning and final dates of manufacture of the recalled vehicles:

100%

III. Describe the Defect or Noncompliance

5. Describe the defect or noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate.

SEE PARKER LETTER

Describe the cause(s) of the defect or noncompliance condition.

SEE PARKER LETTER

Describe the consequence(s) of the defect or noncompliance condition.

SEE PARKER LETTER

Identify any warning which can (a) precede or (b) occur.

SEE PARKER LETTER

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address.

COMMERCIAL / PARKER HANNIFAN

Identify the name and title of the chief executive officer or knowledgeable representative of the supplier:

DAVID B. CROWLEY

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to a defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

7. With respect to a noncompliance, identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined.

SEE PARKER LETTER

V. Identify the Remedy

8. A description of the manufacturer's program for remedying the defect or noncompliance. This program shall include a plan for reimbursing an owner or purchaser who incurred costs to obtain a remedy for the problem addressed by the recall within a reasonable time in advance of the manufacturer's notification of owners, purchasers and dealers, in accordance with §573.13 of this part. A manufacturer's plan may incorporate by reference a general reimbursement plan it previously submitted to NHTSA, together with information specific to the individual recall. Information required by §573.13 that is not in a general reimbursement plan shall be submitted in the manufacturer's report to NHTSA under this section. If a manufacturer submits one or more general reimbursement plans, the manufacturer shall update each plan every two years, in accordance with §573.13. The manufacturer's remedy program and reimbursement plans will be available for inspection by the public at NHTSA headquarters.

SEE PARKER LETTER

9. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the differences between the recall condition and the remedy.

SEE PARKER LETTER

Clearly describe the distinguishing characteristics of the remedy component/assembly versus the recalled component/assembly.

SEE PARKER LETTER

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

SEE PARKER LETTER

VI. Identify the Recall Schedule

10. Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please, identify any foreseeable problems with implementing the recall.

SEE PARKER LETTER

VII. Furnish Recall Communications

11. Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. *A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) for review prior to mailing.*

Note that these documents are to be submitted separately from those provided in accordance with Part 579.5 requirements.

Travis Body, 13955 Fm Road 525, Houston, TX 77041 - 713.486.5889

Safety Recall Follow-up Report

Date: MAR 18 2004

The Office of Defects Investigation (ODI) is conducting a review of safety recall 04E-017, being performed by Parker Hannifin Corporation (Parker Hannifin). This recall involves cylinder. Models are S85DC-55 and S85DC-56. The packing nut on the fourth stage retaining the plunger can loosen, backing off the fourth stage. This condition can continue until the nut backs completely off the stage, if not remedied.

According to information provided by Parker Hannifin, Travis Body, (Travis) was identified as a motor vehicle manufacturer who purchased and/or was supplied the recalled cylinder and should have been notified by Parker Hannifin of the safety recall. The purpose of this request is to ascertain the disposition of the recalled cylinders that were acquired by Travis and identify any motor vehicle that may contain this equipment.

Federal Regulation 49 CFR Part 573, "Defect and Noncompliance Reports," requires that a manufacturer provide the agency with a safety defect information report within 5 days after deciding that a safety defect exists in its motor vehicles and item of equipment. Part 573.3(f) states that "In the case of a defect or noncompliance decided to exist in original equipment installed in the vehicles of more than one manufacturer, compliance with Part 573.5 is required of the equipment manufacturer as to the equipment item, and of each vehicle manufacturer as to the vehicles in which the equipment has been installed". Additionally, Part 573.3(c) provides that for vehicles manufactured in two or more stages either of the manufacturers may satisfy the requirements. As of this date, we have not received notification of the above- described defect from Travis.

If Travis does not agree with the decision made by Parker Hannifin that the recalled cylinders contain a safety defect and could have been installed in Travis vehicles, then please provide an explanation for Travis's position. If Travis has not received any of these recalled cylinders, please so state. If Travis is not a vehicle manufacturer, please state the nature of its business and its relationship with Parker Hannifin

It is important that Travis respond to this follow up report on time. A Safety Defect and Noncompliance Report Guide for vehicles is enclosed to assist you. Your failure to respond promptly and fully to this letter could subject Travis to civil penalties pursuant to 49 U.S.C. § 30165 or lead to an action for injunctive relief.

Your response, in writing or by FAX, is to be submitted to this office by March 31, 2004, referencing BQ04-006. If you have any questions, please contact Mrs. Barbara E. Cooke at (202) 366-6098.

Re: Part 573 Report to NHTSA

Associate Administrator for Enforcement
National Highway Traffic Safety Administration
400 Seventh Street, S.W.
Washington, D.C. 20590

By facsimile and regular mail
Dear Sir or Madam:

The following information is submitted in accordance with the National Highway Traffic Safety Administration's reporting regulations, 49 CFR Part 573.6.

Parker Hannifin Corporation - Mobile Cylinder Division has decided to conduct a safety recall campaign with respect to fourth stage packing nut retention on large, five-stage, telescopic, single acting dump cylinders used on large framed and frameless and dump trailers manufactured by Commercial Intertech/Parker Hannifin Corporation - Mobile Cylinder Division.

Both original equipment and aftermarket cylinder products are involved in this recall.

Product Identification

The telescopic cylinder models that are affected have been commonly referred to as a "Super Dump." The cylinder can be easily identified by a quick visual inspection of the cylinder as it is pinned in the doghouse of the dump trailer. This is done with the trailer completely lowered. Lifting a flexible flap or, removing an access panel, one can view the top pin area and the cylinder packing nuts. See Attachment A, captioned "Typical Super Dump Telescopic Cylinder Application Frameless Trailer."

The following table identifies the entire population of cylinders manufactured with the model numbers referenced. This population had a unique design that required the O.D. packing nut to keep the plunger retained in the cylinder assembly. The common method of retaining plunger is a threaded I.D. stop ring. Production was discontinued in June 2002.

Manufacture Date Range:		July
1996 - March 2001		
Model #	Part #

885DC-55-380	377 2915 116	

Original Equipment Customers

See Attachment B

Recall Population

The entire population of both the 885DC-55-XXX and 885DC-56-XXX models manufactured is covered by this recall, since these products could potentially experience the field condition that causes the packing nut, retaining the plunger, to unscrew. As the condition is related to the cylinder design, it is estimated that all of these cylinders are susceptible.

Number of units produced:

990 units less 78 units known to be scrapped, 912 units	Model: 885DC-55-XXX
(5 units sold through aftermarket distribution)	
1,128 units less 48 units known to be scrapped, 1,080 units	Model: 885DC-56-XXX
(32 units sold through aftermarket distribution)	

Description of Defect

With use, the packing nut on the fourth stage retaining the plunger can loosen, backing off the fourth stage. This condition, if not remedied, can continue until the nut backs completely off the stage. If this occurs, there is nothing to retain the fifth stage or plunger in the assembly. When the cylinder is then extended to its maximum stroke the fifth stage separates from the cylinder assembly causing loss of control over the trailer. The trailer will free fall until it hits the trailer frame and/or fifth wheel.

The division is not aware of any injuries or fatalities related to this matter.

Chronology of Events

Nov. 11, 2003: Received a claim from Bus Mfg that one 885DC-56-265 Super Dump had separated due to the packing nut backing off.

Nov.-Dec. 2003: Parker Mobile Cylinder division considered possible field modification and safety concerns.

Jan. 2004: Parker Mobile Cylinder division reviewed scope of product safety concern, reviewed related claims and discussed details of possible remedy.

Feb. 18, 2004: After consultation with legal counsel, division management determined to conduct a safety recall.

Remedy Program

A field modification kit (375 1805 206) to secure the packing nut in position on models 885DC-55/56-XXX will be provided to customers/owners without charge. The kit provides a drill bit to drill through the packing nut and into fourth stage tube and a tap to thread the hole. Loctite, Allen wrench and (2) setscrews will be included with a written procedure. After drilling and threading, one setscrew is threaded into the packing nut and bottomed in the fourth stage tube at a specified torque, thus locking the packing nut in place. The setscrew is secured with Loctite and then staked.

The division will conduct this campaign for all of its OEM (vehicle manufacturer) customers, as well as for the aftermarket distribution channel.

0YE-017 (3/5)

Part 577 Notice Letter

A draft copy of a Part 577 notice letter is attached hereto (Attachment C). The division is prepared to proceed with its notification program on an immediate basis after the NHTSA review of the Part 577 draft letter.

Please advise the undersigned of the campaign number assigned by the Office of Defects Investigation to this recall.

Sincerely yours,

David B. Crowley
Division Quality/Service Manager
