

**From:** on behalf of Technical Services Department  
**Subject:** 2004 MPV FMVSS Certification Label Recall 2104F

**Attention: Mazda Service and Parts Managers**

This is advance notification of an upcoming recall on certain 2004 MPV models. You will receive detailed information by U.S. mail the week of July 12<sup>th</sup>. This information is also available now by accessing the ESI website, MStore (under Bulletins, Forms & E-Documents), and eMDCS (using Campaign Inquiry or the Warranty Vehicle Inquiry Detail screen by clicking on recall number 2104F).

Mazda Motor Corporation has decided that certain 2004 MPV vehicles produced from August 20, 2003 through May 6, 2004, fail to conform to the tire labeling requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 120, *Tire Selection and Rims for Motor Vehicles other than Passenger Cars*.

On certain 2004 MPV vehicles, the FMVSS certification label mistakenly lists the tire inflation pressure as 32 psi/240 kPa, but the correct inflation pressure is 35 psi/240 kPa. If the tire is operated in an underinflated condition, the load-carrying capacity of the vehicle may be compromised and there is an increased risk of a tire failure and a possible crash.

Owners of affected vehicles will be notified by First Class mail beginning July 16, 2004. The owner letter will include a Supplemental Tire Information Label, and owners will be asked to apply it next to the original FMVSS label on the B-pillar. An instruction sheet for proper application of the label will also be included.
