

January 17, 2007

George Person, Chief
Recall Management Division
Office of Defects Investigation Enforcement
U.S. Department of Transportation
400 Seventh Street, SW
Washington, DC 20590

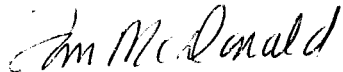

Dear Mr. Person,

Enclosed are contact items for the follow-up mandated by your letter received by Hehr on December 20, 2006 for safety recall 04E – 093. The enclosed information also includes the latest update of the responses to previous follow-ups to make sure that your data matches ours and that we are working to the same population in trying to get the needed responses. The individual who normally handles these matters, Gideon Mbogo, has been on family leave and will return to active status on January 22, 2007.

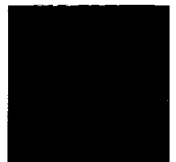

In the interim we have prepared the items enclosed and Mr. Mbogo will initiate the scheduled contact once we have received approval from your office to do so.

We look forward to your review of our items and will make any changes suggested to insure that we have the opportunity to maximize responses from those users who still need to comply with the notice.

Sincerely,

Tom McDonald
Vice President, Sales & Marketing

FOLLOW UP RENOTIFICATION ALERT

Inside Address

Dear DaimlerChrysler bus owner:

In 2005 safety recall 04E – 093 was implemented to replace any defective exit windows Models 1401 and 1407 manufactured by Hehr International Inc. (Hehr) and used on 292 2002 - 2004 MY DaimlerChrysler commercial buses. The defective emergency exit windows fail to open when using the emergency latch to open them. To date only 71 of the 292 buses involved have reporting evaluating their buses and, if necessary, applying the field kit replacement parts. As yet we have received no response from you relative to your buses.

It is imperative that you check for the possible defect noted above to determine if a field fix is needed on any of your buses. To properly check your buses open the egress windows and look closely at the bottom of the swing out panel, specifically at the two rectangular slotted strike plates:

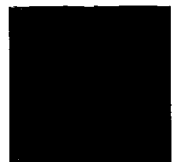

- After opening the window with the emergency release handle, if the metal visible through the slot is aluminum, NO field fix is necessary.
- If the egress emergency latch fails to operate properly and the metal visible through the panel is the black metal frame of the egress panel, the field fix has not been applied and needs to be changed.

For any buses you own that require the field fix, please:

- Write in the number of emergency egress windows requiring the field fix on the list supplied.
- Review the list upon receipt from Hehr and note any corrections needed, such as VIN, name of owner or lessee, address, etc.
- Return the completed form to Hehr in the enclosed, stamped envelope.
- Hehr will send the necessary parts for field fixes within seven (7) business days of receipt of your reply.

If you are the lessee of the buses involved, you need to forward this notice to the lessor within ten (10) days of receipt.

Any required field fixes should be applied immediately upon receipt of the field fix kits and you should return to Hehr the completed field fix forms included in the shipment of field fix kits. Hehr will reimburse for labor required to apply field fixes up to .5 hours for each kit applied at the prevailing labor rate not to exceed \$100.00 per hour. Any reimbursement due you will be mailed within thirty (30) days after the return of your completed notification form.

If you have any difficulty with the field fix, please call Richard Lewis, Chief Engineer at 323-663-1261 ext. 295 or contact him by email at rlewis@hehrintl.com. You may also contact Gideon Mbogo, Marketing Analyst by email at gmbogo@hehrintl.com.

Please make every effort to check your buses and get the results of your evaluation back to Hehr as soon as possible, preferably within ten (10) days of receipt of the renotification alert. Your cooperation will be greatly appreciated.

Very truly yours,

Tom McDonald
Vice President, Sales & Marketing
Hehr International Inc.

SCHEDULE FOR OWNER RENOTIFICATION: 04E – 093

- | | |
|-----------------|--|
| Approx. 2/1/07: | Search of current motive vehicle records begins |
| Approx. 3/1/07 | Date of availability of revised owner list |
| Approx. 4/1/07 | Date on which owner renotification will begin |
| Approx. 4/15/07 | Date on which owner renotification will be completed |
