

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

You may have already been contacted regarding this recall, but this letter is to inform you that parts are available to service your vehicle.

**Reason For This Recall:** General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2000 Chevrolet CK, 2000-2004 model year Chevrolet Silverado and GMC Sierra trucks, 2002-2004 model year Cadillac Escalade EXT and Chevrolet Avalanche trucks, and 2003-2004 Chevrolet Kodiak and GMC TopKick trucks. On some of these vehicles, the galvanized steel tailgate support cables that retain the tailgate in the full open (horizontal) position may corrode, weaken, and eventually fracture. If one cable fractures, the remaining cable may retain the tailgate in a horizontal position. However, if the remaining cable is sufficiently weakened by corrosion, it could fracture within moments of the first cable fracturing, especially if there is a load on the tailgate. If both cables fractured, the tailgate would suddenly drop and strike the top surface of the rear bumper. Anyone sitting or standing on the tailgate when both cables fracture could be injured by falling from the tailgate. On vehicles that have had the bumper removed, the tailgate may drop even lower. Additionally, if there is cargo on the tailgate, the cargo may become unstable and fall if the support cables fracture.

**What Will Be Done:** Your GM dealer will replace the galvanized support cables with stainless steel support cables. In addition, the tailgate hinge will be inspected and replaced, if necessary. This service will be performed for you at **no charge**.

**Until stainless steel support cables can be installed on your vehicle, do not stand, sit, or apply loads directly onto the tailgate when it's in the full open (horizontal) position. This will reduce the potential of personal injury and damage to the outer panel of your tailgate. Additionally, when loading or unloading cargo from the pickup box, the tailgate should be removed. Please see your Owner's Manual for tailgate removal instructions.**

**How Long Will The Repair Take?** This service correction will take approximately 20 to 30 minutes. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

**Contacting Your Dealer:** To limit any possible inconvenience, we recommend that you contact your dealer as soon as possible to schedule an appointment for this repair. By scheduling an appointment, your dealer can ensure that the necessary parts will be available on your scheduled appointment date. Should your dealer be unable to schedule a service date within a reasonable time, you should contact the appropriate Customer Assistance Center at the listed number below. The Customer Assistance Center's hours of operation are from 8:00 AM to 11:00 PM, EST, Monday through Friday.
