

August 2004

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

**Reason For This Recall:** General Motors has decided that certain 2004 model year Chevrolet Cavalier and Pontiac Sunfire vehicles fail to conform to Federal/Canada Motor Vehicle Safety Standard 209, Seat Belt Assemblies, and Standard 210, Seat Belt Assembly Anchorages. On some of these vehicles, the passenger-side rear safety belt may have been installed with an incorrect nut and bolt. In a severe crash, the upper seat belt anchorage may separate. The effectiveness of the seat belt could then be reduced and the occupant could receive greater injuries.

**What Will Be Done:** Your GM dealer will inspect the safety belt anchorage, and if necessary, install a new nut and bolt. This service will be performed for you at no charge.

**How Long Will The Repair Take?** This service correction will take approximately 25 to 45 minutes. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

**Contacting Your Dealer:** To limit any possible inconvenience, we recommend that you contact your GM dealer as soon as possible to schedule an appointment for this repair. By scheduling an appointment, your dealer can ensure that the necessary parts will be available on your scheduled appointment date. Should your dealer be unable to schedule a service date within a reasonable time, you should contact the appropriate Customer Assistance Center at the listed number below. The Customer Assistance Center's hours of operation are from 8:00 AM to 11:00 PM, EST, Monday through Friday.
