Recall Campaign No. 04V-309; Fuel Line Clip

Dear BMW Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

BMW AG has decided that a defect which relates to motor vehicle safety exists in certain 2004 Model Year BMW 5-Series and 6-Series vehicles equipped with the 8-cylinder engine (545i, 645Ci, 645Ci). Our records indicate that you are the owner of a potentially affected vehicle.

DESCRIPTION OF DEFECT

The defect involves a circular retention clip at the quick-release coupling along the fuel supply line. This retention clip was inadvertently not installed. As a result, it is possible that in a severe frontal crash, the quick-release coupling could separate. If this happens, it is possible that a small amount of fuel could leak. In some cases, it is also possible that this small amount of fuel could ignite.

Your vehicle can still be driven; however, do not leave this problem unattended.

PRECAUTIONS

1. **CONTACT YOUR AUTHORIZED BMW CENTER IMMEDIATELY TO HAVE THE NECESSARY REPAIR PERFORMED AS SOON AS POSSIBLE.**
2. **BMW recommends that you always wear your safety belt, and that all passengers are properly seated and restrained at all times.**

DESCRIPTION OF REPAIR

The repair will consist of installing a circular retention clip at the quick-release coupling along the fuel supply line of all affected vehicles.

The repair will require approximately one hour. This work will be performed *free of charge* by your Authorized BMW center. Additional time may be required depending on the BMW center's scheduling and processing.
