SAFETY RECALL – TIGHTEN REAR SEAT BELT BOLTS

Dear: (Name)

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

DaimlerChrysler Corporation has decided that a defect, which relates to motor vehicle safety, exists in some **2005 model year Chrysler Sebring Sedan and Dodge Stratus Sedan vehicles.**

The problem is... The left and right rear seat belt retractor and turning loop bolts on your vehicle (VIN: xxxxxxxxxxxxxxxxx) may not have been properly tightened. This could cause seat belt separation in certain crash conditions, which can increase the risk of injury to rear seat passengers.

What your dealer will do... DaimlerChrysler will repair your vehicle free of charge (parts and labor). To do this, your dealer will tighten the rear seat belt retractor and turning loop bolts to the proper specification. The work will take less than ½ hour to complete. However, additional time may be necessary depending on how dealer appointments are scheduled and processed.

What you must do to ensure your safety... Simply contact your dealer right away to schedule a service appointment. Remember to bring this letter with you to your dealer.

If you need help... If you have questions or concerns which your dealer is unable to resolve, please contact DaimlerChrysler at 1-800-853-1403.

Please help us update our records, by filling out the enclosed prepaid postcard, if any of the conditions listed on the card apply to you or your vehicle. Be sure to print the last eight (8) characters of the VIN (VVVVVVVV) and notification code D52 on the postcard.
