

January 30, 2006

Dear Mrs. Schuler,

Attached please find copies of our quarterly notification reports regarding recalls. Due to our implementation of a new operating system for warranty claims, these reports are several days overdue. In order to verify the accuracy of the reports generated from our new system, extra time was utilized. I apologize for this delay and assure you we do not foresee a delay in the future creation of these reports.

During the process of reconciling data, we determined that two of our recalls have the incorrect unit counts. These recalls were reported to NHTSA with a specific number of affected units; however several of the reported units were fixed in Japan prior to exportation. Historically, our legacy warranty system was not able to isolate this information. We would like the opportunity to revise the number of affected units with respect to two previous recall campaigns which have been active for over a year; the affected units will decrease by approximately 300 units.

I look forward to hearing from you regarding the proper steps we can take to rectify this issue. I apologize for any inconvenience this may cause and appreciate your help in this matter.

Thank you,

A handwritten signature in black ink, appearing to read "Eric Lannon", is written over a horizontal line.

Eric Lannon
Warranty Manager
