This bulletin has been amended. The part order email address in the Parts Information has been changed. No other changes have been made. Please discard all previous versions of this bulletin.

CAMPAIGN I.D. # / NHTSA #: R0401 & R0402 / 04V-230

APPLIED VEHICLES:
1999 - 2003 Frontier (D22)
2000 – 2003 Xterra (WD22)

APPLIED VINS:
Vehicles built within the below VIN ranges:

Frontier:
1N6*D2*Y*XC300001-345558
1N6*D2*T*YC300001-437820
1N6*D2*Y*YC300002-437828
1N6*D2*T*1C300001-404427
1N6*D2*Y*1C300002-404387
1N6*D2*T*2C300002-396643
1N6*D2*X*2C300011-396637
1N6*D2*Y*2C300001-396641
1N6*D2*T*3C400001-438379
1N6*D2*X*3C400006-438371
1N6*D2*Y*3C400002-438380

Xterra:
5N1*D2*T*YC500001-612775
5N1*D2*Y*YC500005-612751
5N1*D2*T*1C500001-599018
5N1*D2*Y*1C500002-599014
5N1*D2*T*2C500000-606345
5N1*D2*Y*2C500002-606344
5N1*D2*T*3C600001-666247
5N1*D2*Y*3C600000-666244

NOTE: Use Service Comm to confirm campaign eligibility.
INTRODUCTION

Nissan has determined that some 1999-2003 model year Nissan Frontier vehicles, equipped with the 6 cylinder engine and 2000-2003 model year Nissan Xterra vehicles, equipped with the 4 and 6 cylinder engine may have a defect which relates to motor vehicle safety. There is a possibility that the fuel pump terminal on the fuel-sending unit may develop a crack in its plastic molding which could cause the terminal strip to corrode under some environmental conditions. If corrosion occurs, the terminal strip could eventually break. This will cause the fuel pump to stop operating and will result in not being able to start the engine or cause the engine to stop running without warning during vehicle operation, which could result in a crash. To prevent this condition from occurring, Nissan is conducting a Voluntary Safety Recall Campaign to replace or repair the fuel-sending unit.

IDENTIFICATION NUMBER

Nissan has assigned identification number R0401 & R0402 to this campaign. These numbers must appear on all communications and documentation of any nature dealing with this campaign.

R0401

• This PNC group is for vehicles located in the “Salt” states (shown below). Service Comm will identify these vehicles.

    Salt States Include:
    Connecticut Kentucky New Hampshire Tennessee
    Delaware Maine New Jersey Vermont
    District of Columbia Maryland New York Virginia
    Illinois Massachusetts Ohio West Virginia
    Indiana Michigan Pennsylvania Wisconsin
    Iowa Minnesota Rhode Island

R0402

• This PNC group is for vehicles identified as NOT being located in the “Salt” states. Service Comm will identify these vehicles.

NUMBER OF VEHICLES POTENTIALLY AFFECTED

The number of vehicles potentially affected is approximately 590,000.

DEALER RESPONSIBILITY

It is the retailer’s responsibility to check Service Comm for the campaign status on each vehicle falling within the range of this voluntary safety recall which for any reason enters the service department. This includes vehicles purchased from private parties or presented by transient (tourist) owners and vehicles in a dealer’s inventory. **Federal law requires that new vehicles in dealer inventory which are the subject of a safety recall must be corrected prior to sale. Failure to do so can result in civil penalties by the National Highway Traffic Safety Administration.** While federal law applies only to new vehicles, Nissan strongly encourages dealers to correct any used vehicles in their inventory before they are retailed.
SERVICE PROCEDURE
Use this Repair Flow Chart to determine the Service Procedure.

Repair Flow Chart

Use Service Comm to determine which PNC applies to the vehicle you are working on.

R0401

Replace the Fuel Sending Unit and apply Tectyl 517 (Bitumen) Wax Sealer to the Fuel Sending Unit Mounting Flange area.

- **Frontier**: See page 11 for the Fuel Sending Unit Replacement and Wax Sealer application procedures.
- **Xterra**: See page 25 for the Fuel Sending Unit Replacement and Wax Sealer application procedures.

**NOTE**: During the Fuel Sending Unit replacement procedure, you’ll be instructed to inspect the Fuel Sending Unit Mounting Flange and O-Ring Groove (on the Fuel Tank). Based on the inspection results, you may have to replace the Fuel Tank.

End

R0402

Inspect the Fuel Sending Unit.*

- **Frontier**: See page 5 for the Fuel Sending Unit Inspection procedure.
- **Xterra**: See page 18 for the Fuel Sending Unit Inspection procedure.

Is there green corrosion at the Fuel Pump Connector?

Yes

No

Add a “protective coating” to the Fuel Sending Unit connectors.

- **Frontier**: See page 10 for the Fuel Sending Unit Protective Coating procedure.
- **Xterra**: See page 24 for the Fuel Sending Unit Protective Coating procedure.

End

* A visual-aid “Pocket Card” was previously supplied to each dealer. For additional or replacement Pocket Cards, call the Resolve Corporation (formerly DDS Distribution) at (562) 698-2688.

The part number for the Pocket Card is “D22/WD22 Insp”.

3/41
The following items are required to perform the procedures contained in this bulletin.

- **Cleaning/Sealing Kit #B5060-79900**
  - One kit per vehicle
  - Kit contains: 1 Cleaning Adapter, 1 Sealing Adapter, and 1 Connector Cover
- **Kit A (3-Port):** Kit contains: 4 Rubber Plugs and 1 Protective Cover (kit can be re-used)
- **Kit B (5-Port):** Kit contains: 6 Rubber Plugs and 1 Protective Cover (kit can be re-used)
- **Connector Removal Tool #J-47009** (previously sent to dealer)
- **Nylon Brush #J-47239** (previously sent to dealer)
- **Vacuum Pump #J-42909** (essential tool)
- **Hose Removal Pliers** (recommended tool: Lisle Corp. #47900, or equivalent)
- **Copper/Bronze Bristle Brush** (recommended tool)
- **Abrasive Pad** (recommended item: 3M Scotch Brite Pad #051131-07447, or equivalent)
- **Protective Coating #KY140-9Z400** (one can good for about 40 vehicles)
- **Brake Cleaner #999MP-AH001P** (one can good for about 20 vehicles)
- **Rust Penetrant #999MP-A3020P** (one can good for about 20 vehicles)
- **Tectyl 517 (Bitumen) Wax Sealer #999MP-9G001P** (one can good for about 20 vehicles)
1. Raise the vehicle on a hoist so you can reach the Fuel Sending Unit Connectors (see Figure 2).

2. Use the Connector Removal Tool #J-47009 to disconnect the Fuel Sending Unit Connectors (4-wire connector and 2-wire connector). See Figure 3.

**NOTE:** For 1999 and 2000 MY Frontier:
- The Connector Removal Tool cannot be used on the 4-wire connector.
- To release this connector, push forward on the Sliding Button (on top of the connector). See Figure 3.
3. Install the Connector Cover onto the Fuel Sending Unit Connectors until it is fully seated. See Figure 4.

4. Use the Nylon Brush #J-47239 to loosen/remove dirt and debris on the vertical surface of the Fuel Sending Unit Connectors (see Figure 5).

5. Remove the Connector Cover once you’re done with the above step.
6. Install the Cleaning Adapter (white color adapter) onto the Fuel Sending Unit Connectors until it clicks (locks) in place. See Figure 6.

![Figure 6](TP040374)

CAUTION: When performing the following steps, use suitable protective gloves, safety glasses, or face shield.

7. Spray Brake Cleaner #999MP-AH001P through each Adapter Tube for about two seconds (see Figure 7).
   - You will need to insert the Adapter Tube into the Brake Cleaner spray can nozzle.

8. Remove and discard the Cleaning Adapter.

NOTE:
- When you remove the Cleaning Adapter, one or both of the connector inserts may come out of the Adapter.
- Make sure you remove the insert(s) from the Fuel Sending Unit connector(s).
9. Install the Connector Cover onto the Fuel Sending Unit Connectors until it is fully seated. See Figure 8.

10. Use shop air to thoroughly dry the vertical surface of the Fuel Sending Unit Connectors, then remove the Connector Cover. See Figure 9.
11. Inspect the **Fuel Pump** Connector for green corrosion.
   - Inspection is NOT required for the Fuel Level Sensor Connector.
   - Use a mirror (if needed) to look at the connector.
   - See illustrations below for examples of green corrosion.
   a. If **OK**, go to “Frontier: Add Protective Coating To Fuel Sending Unit” (next page).
   b. If **NG**, go to “Frontier: Replace Fuel Sending Unit” (page 11).
Frontier: Add Protective Coating To Fuel Sending Unit

1. Install the Sealing Adapter (blue color adapter) onto the Fuel Sending Unit Connectors until it clicks (locks) in place. See Figure 10.

CAUTION: When performing the following steps, use suitable protective gloves, safety glasses, or face shield.

2. Shake the Protective Coating can #KY140-9Z400 to thoroughly mix the contents.

3. Spray the Protective Coating #KY140-9Z400 through each Adapter Tube for about two seconds (see Figure 11).
   - You will need to attach the Adapter Tube onto the Protective Coating spray can nozzle.
   - You do not have to wait for the Protective Coating to dry. Proceed to the next step.

4. Remove and discard the Sealing Adapter.

   NOTE:
   - When you remove the Sealing Adapter, one or both of the connector inserts may come out of the Adapter.
   - Make sure you remove the insert(s) from the Fuel Sending Unit connector(s).

5. Re-connect the Fuel Sending Unit Harness Connectors, making sure they are securely locked into position.

6. Start the vehicle and confirm proper engine running and fuel gauge operation.
WARNING:

• Before performing any of the Service Procedures below, be certain there are no ignition sources (i.e., open flames, sparks, etc.) in or around the vehicle/work area.
• Make sure the appropriate rated fire extinguisher is available for immediate use.
• Use suitable protective gloves, safety glasses, or face shield.

CAUTION: Use suitable covers to protect carpet, upholstery, etc.

NOTE: The Fuel Sending Unit that you remove from the vehicle may look different from the new replacement service part (see Figure 43 on page 32).

1. Release the fuel pressure from the fuel system using CONSULT-II (or other suitable method). Follow the procedure in the “EC” section of the Service Manual.

2. Use a suitable device to remove the fuel from the fuel tank.

3. Remove the fuel tank:

• For detailed instructions on fuel tank removal and installation, refer to the vehicle-specific Service Manual, Section FE (Fuel And Exhaust)/Fuel System/Removal and Installation/Fuel Tank.

  WARNING: Follow all warnings and cautions provided in the Service Manual.

• Before disassembly: use duct tape and an “indelible” marker (permanent marker), to mark the matching pipes and hoses, which are attached to the fuel filler neck (see Figure 12).

  • The hoses MUST be re-connected to the same pipes they were removed from.
  • If the hoses are re-connected incorrectly, refueling difficulties may occur.

![Figure 12](TP010297)

Figure 12
4. Plug all Fuel Tank openings, **except the Pressure Port** (see Figure 13).

   - Use **Kit A** for Fuel Tanks with 3 ports (1999-2000 Frontier & Xterra)
   - Use **Kit B** for Fuel Tanks with 5 ports (2000-2003 Frontier & Xterra)

**NOTE:** Kit A and Kit B will be automatically sent to each dealer.

---

**Figure 13**

5. Install the Connector Covers (from Kit #B5060-79900) onto the Fuel Sending Unit Connectors until they are fully seated (see Figure 13).

6. Remove the Fuel Sending Unit as follows:

   a. First, use shop air to clean the area around the Fuel Sending Unit and Mounting Flange (see Figure 14).
b. Then, apply Rust Penetrant (999MP-A3020P) to the Fuel Sending Unit Mounting Flange Bolts (see Figure 15). Allow the penetrant to “soak” for a few minutes.

c. **Using hand tools ONLY**, gently remove the Fuel Sending Unit Mounting Flange Bolts.

d. Remove the Fuel Sending Unit.

**NOTE:** To disconnect the fuel return hose from the Fuel Sending Unit, do the following:
- Push UP on the fuel return hose connector 1 to 2 mm (around 1/16-inch). See Figure 16A.
- With the hose connector pushed UP, hold the two plastic tabs. See Figure 16B.
- While holding the plastic tabs, pry DOWN on the hose connector with hose removal pliers (such as #47900, Lisle Corporation or equivalent). See Figure 16C.

**NOTE:** The hose removal pliers (noted above) are available from TECH-MATE at 1-800-662-2001 (option #4).
- Cut and discard the old Fuel Sending Unit O-ring. You’ll be installing a new O-ring later.
7. Inspect the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove (see Figure 17 and 18).

IF:
● There are no broken bolts on the Mounting Flange.
● The O-Ring groove has NO or light rust (no scaling) and can be cleaned with a light abrasive pad (such as Scotch Brite Pad 3M #051131-07447) or a copper/bronze bristle brush. See Figures 19 & 20.

THEN:
● The Fuel Tank is OK and can be re-used.
● Proceed with step 8.

Figure 17

IF:
● There are broken bolts on the Mounting Flange, or
● The O-Ring groove is rusty (scaling) and can NOT be cleaned with a light abrasive pad (such as Scotch Brite Pad 3M #051131-07447) or a copper/bronze bristle brush.

THEN:
● The Fuel Tank is NO GOOD and must be replaced.
● Replace the Fuel Tank, perform steps 11 & 12, then proceed with Step 17.

Figure 18
NOTE: If a new Fuel Tank is installed, perform steps 11 & 12 below, then proceed with step 17 on page 17.

8. Insert the Protective Cover provided in Kit A (3-port) or Kit B (5-port) in the Fuel Tank opening (see Figure 19).

**CAUTION:** Make sure the Protective Cover is properly inserted/seated to prevent rust and debris from entering the Fuel Tank.

9. Completely clean the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove by hand using Scotch Brite Pad 3M #051131-07447 or a copper/bronze bristle brush. See Figure 20.

**WARNING:**

- Do NOT use any power tools (pneumatic or electric) for cleaning the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove.
- Use proper care and precaution when working around gasoline.
- Be certain there are no ignition sources (i.e., open flames, sparks, etc.) in or around the vehicle/work area.
- Make sure the appropriate rated fire extinguisher is available for immediate use.
- Use suitable protective gloves, safety glasses, or face shield.

10. Use shop air to completely blow off/clean the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove.

11. Install the new Fuel Sending Unit O-ring in the groove on the fuel tank.

12. Use the new mounting screws to install the Fuel Sending Unit on the fuel tank. Refer to the “FE” section in the applicable Service Manual.

- Tighten the Fuel Sending Unit mounting screws to **2.0 – 2.5 N-m (0.20 – 0.26 kg-m, 17.4 – 22.6 in-lb)**.
REMEMBER: If a new Fuel Tank is installed, perform steps 11 & 12 on the previous page, then proceed with step 17 on page 17.

14. Connect Essential Tool Vacuum Pump J-42909 to the Fuel Tank Pressure Port (see Figure 21).
   - Before using the Vacuum Pump, make sure it works properly and can hold pressure.

15. Apply air pressure, not to exceed 2 p.s.i. (Maximum) regulated air pressure, to the Fuel Tank using the Vacuum Pump/supply air.

   NOTE: After you pressurize the Fuel Tank, “pinch off” the hose going to the supply air to prevent pressure leakage.

16. Monitor the air pressure in the Fuel Tank for 1 minute:
   a. If the air pressure holds at 2 p.s.i. (for 1 minute), and there are no bubbles around the Fuel Sending Unit, proceed with the next step.
   b. If the air pressure does NOT hold at 2 p.s.i. (for 1 minute), and/or there are bubbles around the Fuel Sending Unit, replace the Fuel Tank * and proceed with the next step.

   * Make sure you transfer the new O-Ring and Fuel Sending Unit from the old Fuel Tank to the new Fuel Tank.
17. Apply Tectyl 517 (Bitumen) Wax Sealer to the Fuel Sending Unit Mounting Flange area as follows:
   
   a. Completely clean and dry off (with shop air) the Mounting Flange area.

   b. Then, apply ONLY Tectyl 517 (Bitumen) Wax Sealer (999MP-9G001P) around the outer edge of the Fuel Sending Unit Mounting Flange (see Figure 22).

   • Thoroughly shake the can of Wax Sealer to ensure complete mixing.

18. Remove all Rubber Caps and the Connector Covers from the Fuel Tank/Sending Unit.

19. Re-install the fuel tank. Refer to the “FE” section in the applicable Service Manual.

IMPORTANT:
   • Make sure the hoses removed from the fuel tank are correctly installed to the same pipes they were removed from.
   • Make sure the Fuel Sending Unit Wire Harness Connectors are securely locked into position.
   • Make sure all Fuel/EVAP hoses are in good condition (no cracks, splits, etc.) and are securely reconnected to prevent leaks.

20. Re-assemble all previously removed components in the reverse order you removed them.

21. Start the vehicle and confirm proper engine running and fuel gauge operation.
Xterra: Inspect Fuel Sending Unit

CAUTION: Use suitable covers to protect carpet, upholstery, paint, etc. when performing this procedure.

1. Remove the rear, passenger-side, bottom Seat Cushion as follows:
   a. Pull on the Seat Cushion Release Straps while lifting UP on the front edge of the Seat Cushion (see Figure 23).
   b. Remove the Cushion and place it in a clean, safe location.

2. Remove four Bolts and remove the Body Cover Plate (see Figure 24).
3. Remove three Bolts and lift the Fuel Sending Unit Inspection Cover UP (see Figure 25).

4. Disconnect the Fuel Sending Unit Connectors (see Figure 26).
5. Install the Connector Cover onto the Fuel Sending Unit Connectors until it is fully seated. See Figure 27.

6. Use the Nylon Brush #J-47239 to loosen/remove dirt and debris on the vertical surface of the Fuel Sending Unit Connectors (see Figure 28).

   **NOTE:** If needed, you can bend the Brush to better reach the vertical surfaces.

7. Remove the Connector Cover once you’re done with the above step.
8. Install the Cleaning Adapter (white color adapter) onto the Fuel Sending Unit Connectors until it clicks (locks) in place. See Figure 29.

CAUTION: When performing the following steps:

- Use suitable protective gloves, safety glasses, or face shield.
- Use suitable covers to protect carpet, upholstery, etc.

9. Spray Brake Cleaner #999MP-AH001P through each Adapter Tube for about two seconds (see Figure 30).

- You will need to insert the Adapter Tube into the Brake Cleaner spray can nozzle.

10. Remove and discard the Cleaning Adapter.

NOTE:

- When you remove the Cleaning Adapter, one or both of the connector inserts may come out of the Adapter.
- Make sure you remove the insert(s) from the Fuel Sending Unit connector(s).
11. Install the Connector Cover onto the Fuel Sending Unit Connectors until it is fully seated. See Figure 31.

12. Use shop air to thoroughly dry the vertical surface of the Fuel Sending Unit connectors, then remove the Connector Cover. See Figure 32.
13. Inspect the **Fuel Pump** Connector for green corrosion.

- Inspection is NOT required for the Fuel Level Sensor Connector.
- Use a mirror to look at the connector.
- See illustrations below for examples of green corrosion.

a. If **OK**, go to “Xterra: Add Protective Coating To Fuel Sending Unit” (next page).

b. If **NG**, go to “Xterra: Replace Fuel Sending Unit” (page 25).
1. Install the Sealing Adapter (blue color adapter) onto the Fuel Sending Unit Connectors until it clicks (locks) in place. See Figure 33. **CAUTION:** When performing the following steps:
   - **Use suitable protective gloves, safety glasses, or face shield.**
   - **Use suitable covers to protect carpet, upholstery, etc.**

2. Shake the Protective Coating can #KY140-9Z400 to thoroughly mix the contents.

3. Spray the Protective Coating #KY140-9Z400 through each Adapter Tube for about two seconds (see Figure 34).
   - You will need to attach the Adapter Tube onto the Protective Coating spray can nozzle.
   - You do not have to wait for the Protective Coating to dry. Proceed to the next step.

4. Apply Tectyl 517 Wax Sealer to the Fuel Sending Unit Mounting Flange area. Make sure the area is clean and dry before applying the Tectyl 517.

5. Remove/discard the Sealing Adapter. **NOTE:**
   - When you remove the Sealing Adapter, one or both of the connector inserts may come out of the Adapter.
   - Make sure you remove the insert(s) from the Fuel Sending Unit connector(s).

6. Re-connect the Fuel Sending Unit Harness Connectors, making sure they are securely locked into position.

7. Re-assemble all previously removed components in the reverse order you removed them.
   - Tighten the Fuel Sending Unit Inspection Cover Bolts snug, being careful not to strip out the plastic inserts.
   - Tighten the Body Cover Plate Bolts to **3.7 – 5.0 N-m (0.38 – 0.51 kg-m, 33.0 – 44.3 in-lb).**

8. Start the vehicle and confirm proper engine running and fuel gauge operation.
Xterra: Replace Fuel Sending Unit

WARNING:
- Before performing any of the Service Procedures below, be certain there are no ignition sources (i.e., open flames, sparks, etc.) in or around the vehicle/work area.
- Make sure the appropriate rated fire extinguisher is available for immediate use.
- Use suitable protective gloves, safety glasses, or face shield.

CAUTION: Use suitable covers to protect carpet, upholstery, etc.

NOTE: The Fuel Sending Unit that you remove from the vehicle may look different from the new replacement service part (see Figure 43).

1. If the fuel tank is more than ¾ full, use a suitable device to remove fuel from the fuel tank until the fuel level is ¾ full or less.

2. Release the fuel pressure from the fuel system using CONSULT-II (or other suitable method). Follow the procedure in the “EC” section of the Service Manual.

3. Remove the Fuel Sending Unit as follows:

   a. First, use shop air to clean the area around the Fuel Sending Unit and Mounting Flange (see Figure 35).

   b. Then, apply Rust Penetrant (999MP-A3020P) to the Fuel Sending Unit Mounting Flange Bolts (see Figure 36). Allow the penetrant to “soak” for a few minutes.

   c. Using **hand tools ONLY**, gently remove the Fuel Sending Unit Mounting Flange Bolts.
4. Remove the Fuel Sending Unit.

**NOTE:** To disconnect the fuel return hose from the Fuel Sending Unit, do the following:

- Push **UP** on the fuel return hose connector 1 to 2 mm (around 1/16-inch). See Figure 37A.
- With the hose connector pushed **UP**, hold the two plastic tabs. See Figure 37B.
- While holding the plastic tabs, pry **DOWN** on the hose connector with hose removal pliers (such as #47900, Lisle Corporation or equivalent). See Figure 37C.

**NOTE:** The hose removal pliers (noted above) are available from TECH-MATE at 1-800-662-2001 (option #4).

- Cut and discard the old Fuel Sending Unit O-ring. You’ll be installing a new O-ring later.

![Figure 37A](image)

![Figure 37B](image)

![Figure 37C](image)
5. Inspect the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove (see Figure 38 and 39).

**IF:**
- There are no broken bolts on the Mounting Flange.
- The O-Ring groove has NO or light rust (no scaling) and can be cleaned with a light abrasive pad (such as Scotch Brite Pad 3M #051131-07447) or a copper/bronze bristle brush. See Figures 40 & 41.

**THEN:**
- The Fuel Tank is **OK** and can be re-used.
- Proceed with step 6.

![Figure 38](image)

**IF:**
- There are broken bolts on the Mounting Flange, or
- The O-Ring groove is rusty (scaling) and can NOT be cleaned with a light abrasive pad (such as Scotch Brite Pad 3M #051131-07447) or a copper/bronze bristle brush.

**THEN:**
- The Fuel Tank is **NO GOOD** and must be replaced.
- Replace the Fuel Tank, then proceed with Step 9.

![Figure 39](image)
6. Insert the Protective Cover (provided in Kit A or Kit B) in the Fuel Tank opening (see Figure 40).

**CAUTION:** Make sure the Protective Cover is properly inserted/seated to prevent rust and debris from entering the Fuel Tank.

![Figure 40](TP040670)

7. Completely clean the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove by hand using Scotch Brite Pad 3M #051131-07447 or a copper/bronze bristle brush. See Figure 41.

**WARNING:**
- **Do NOT** use any power tools (pneumatic or electric) for cleaning the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove.
- Use proper care and precaution when working around gasoline.
- Be certain there are no ignition sources (i.e., open flames, sparks, etc.) in or around the vehicle/work area.
- Make sure the appropriate rated fire extinguisher is available for immediate use.
- Use suitable protective gloves, safety glasses, or face shield.

![Figure 41](TP040671)

8. Use shop air to completely blow off/clean the Fuel Tank Sending Unit Mounting Flange and O-Ring Groove.

9. Install the **new** Fuel Sending Unit O-ring in the groove on the fuel tank.

10. Use the **new** mounting screws to install the Fuel Sending Unit on the fuel tank. Refer to the “FE” section of the applicable Service Manual.

- Tighten the Fuel Sending Unit mounting screws to **2.0 – 2.5 N-m (0.20 – 0.26 kg-m, 17.4 – 22.6 in-lb)**.

**IMPORTANT:** Make sure the Fuel Sending Unit Wire Harness Connectors are securely locked into position.
11. Apply Tectyl 517 (Bitumen) Wax Sealer to the Fuel Sending Unit Mounting Flange area as follows:

   a. Completely clean and dry off (with shop air) the Mounting Flange area.

   b. Apply ONLY Tectyl 517 (Bitumen) Wax Sealer (999MP-9G001P) around the outer edge of the Fuel Sending Unit Mounting Flange (see Figure 42).

   • Thoroughly shake the can of Wax Sealer to ensure complete mixing.

12. Re-assemble all parts you removed before (except the Fuel Sending Unit Inspection Cover and Body Cover) in the reverse order you removed them.

   **NOTE:** Make sure all Fuel/EVAP hoses are in good condition (no cracks, splits, etc.) and are securely reconnected to prevent leaks. Also, make sure the gas cap is installed and securely tightened.

13. Use CONSULT-II to check the Fuel Tank for leaks as follows:

   a. Connect CONSULT-II.

   b. Turn the ignition key to the **ON** position (with engine off).

   c. Select: **Engine, Work Support, EVAP System Close**, and **Start**.

   d. Attach the Vacuum Pump J-42909 to the vehicle’s under hood EVAP System service port.

   e. Use the Vacuum Pump to pressurize the EVAP System until the bar graph on the CONSULT-II screen reads half.

   • If there is **NO** pressure drop before 1 minute elapses (goes by), go to the next step.

   • If there is **any** pressure drop before 1 minute elapses (goes by), recheck all hoses/connections and perform the test again.

   **NOTE:** If you still have a leak, replace the Fuel Tank and go to the next step.

14. Install/tighten the Fuel Sending Unit Inspection Cover Bolts snug, being careful not to strip out the plastic inserts.

15. Install/tighten the Body Cover Plate Bolts to **3.7 – 5.0 N-m (0.38 – 0.51 kg-m, 33.0 – 44.3 in-lb)**.

17. Start the vehicle and confirm proper engine running and fuel gauge operation.
PARTS INFORMATION

NOTE: The Fuel Sending Unit that you remove from the vehicle may look different from the new replacement service part (see Figure 43).

### Section 3. Hazards Identification

Physical State and Appearance: Aerosol

Emergency Overview:

WARNING!
Flammable aerosol. Keep away from sources of heat, sparks, or flames. May be harmful if inhaled or swallowed. *Keep away from food.* Causes eye irritation. May cause respiratory tract and skin irritation. Possible birth defect hazard. Contains material which causes damage to the following organs: blood, kidneys, liver, bladder, brain, skin, eyes, central nervous system.

Avoid contact with eyes, skin and clothing. Do not ingest. Avoid breathing vapor or mist. Keep container closed. Use only with adequate ventilation. Avoid exposure during pregnancy. Wash thoroughly after handling.

Routes of Entry: Absorbed through skin. Dermal contact. Eye contact. Inhalation. Ingestion.

Potential Acute Health Effects:

**Eyes**
Eye irritant. Inflammation characterized by pain, redness, and/or blurred vision.

**Skin**
MAY BE ABSORBED (see inhalation). Skin irritant. Skin inflammation is characterized by dry skin and redness. Propellant (methyl ether) as a liquid, may cause frost bite on contact with skin.

Continued on Next Page
**Section 4. First Aid Measures**

**Eye Contact**
In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easily possible, remove contact lenses. Get medical attention immediately.

**Skin Contact**
Remove contaminated clothing. Rinse skin with plenty of water or shower. Then wash skin with water and soap. Refer to medical attention.

**Inhalation**
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

**Ingestion**
Rinse mouth. In case of ingestion of large amounts give slurry of activated charcoal in water to drink. Do NOT induce vomiting. Immediately refer to medical attention.

**Notes to Physician**
Not available.

**Section 5. Fire Fighting Measures**

**Flammability of the Product**
Flammable.

**Auto-Ignition Temperature**
The lowest known value is 238°C (460.4°F) (2-Butoxyethanol).

**Flash Points**
<0°C (propellant)

**Flammable Limits**
The greatest known range is LOWER: 1.1%  UPPER: 12.7% (2-Butoxyethanol)

**Products of Combustion**
These products are carbon oxides (CO, CO2).

**Fire Hazards in Presence of Various Substances**
Flammable in presence of open flames and sparks.

**Explosion Hazards in Presence of Various Substances**
Closed containers may explode (due to build-up pressure) when exposed to extreme heat. Isolate from heat, electrical equipment, sparks, and flame.

**Fire Fighting Media and Instructions**
SMALL FIRE: Shut off supply, if possible let fire burn itself out; in other cases use DRY chemical powder, carbon dioxide.
LARGE FIRE: Use water spray, fog or alcohol resistant foam. Do not use water jet. Keep containers cool by spraying with water.

**Protective Clothing (Fire)**
Full protective equipment including self contained breathing apparatus should be used.

**Special Remarks on Fire Hazards**
Vapors may form explosive mixtures with air. This material is flammable and may be ignited by heat, sparks, flames, or other sources of ignition such as static electricity, pilot lights, and mechanical/electrical equipment. Vapors may travel considerable distances to a source of ignition where they can ignite, flashback, or explode. May create vapor/air explosion hazard indoors, outdoors, or sewers. Vapors are heavier than air and can accumulate in low areas. May polymerize explosively when heated or involved in fire.

**Special Remarks on Explosion Hazards**
Container explosion may occur under fire conditions.

---

TP040437
Section 6. Accidental Release Measures

Small Spill and Leak
Absorb with an inert material and put the spilled material in a sealable container. Do not wash away into sewer. Extinguish all ignition sources and ventilate area. Wear protective equipment during clean-up.

Large Spill and Leak
Evacuate danger area. Consult an expert. Remove all ignition sources.

Section 7. Handling and Storage

Handling
Keep away from heat, sparks, and open flames. Do not puncture, incinerate, or expose to high temperatures. Avoid contact with eyes, skin and clothing. Do not ingest. Avoid breathing vapors or spray mists. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Storage
Keep in fireproof, cool area that is separate from strong oxidants.

Section 8. Exposure Controls, Personal Protection

Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective threshold limit value. Ensure that eyewash stations and safety showers are proximal to the work-station location.

Personal Protection

Eyes
Splash goggles.

Body
Long sleeves work apparel must be worn. Depending on conditions of use, solvent resistant plastic or rubber apron should be worn.

Respiratory
Vapor respirator. Be sure to use an approved/certified respirator or equivalent. Wear appropriate respirator when ventilation is inadequate.

Hands
Gloves.

Feet
Safety shoes. Chemical resistant shoes.

Protective Clothing (Pictograms)

Personal Protection in Case of a Large Spill
Splash goggles. Full suit. Boots. Gloves. A self-contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

### Section 10. Stability and Reactivity

| Stability and Reactivity | The product is stable. |
| Conditions of Instability | Heating may cause violent combustion or explosion. |
| Incompatibility with Various Substances | Reactive with oxidizing agents, acids. Slightly reactive to reactive with alkalis, moisture. |
| Hazardous Decomposition Products | Not available. |
| Hazardous Polymerization | Not available. |

### Section 11. Toxicological Information

| Toxicity to Animals | Acute oral toxicity (LD50): 50 mg/kg [Human/30 min]. (Toluene). |
| Chronic Effects on Humans | Repeated or prolonged contact with skin may cause dermatitis or may defat the skin. Long term or repeated exposure may have effect on central nervous system, resulting in decreased learning ability and psychological disorders. Contains Carbon Black which is Classified 2B (Possible for human.) by IARC, but Classified A4 (Not classifiable for human or animal.) by ACGIH and not classified by OSHA. Contains Toluene which is a suspected teratogen for humans. |

**Continued on Next Page**
Hazardous in case of skin contact (irritant), of inhalation (lung irritant). May be fatal if ingested.

Overexposure to Toluene has been suggested as a cause of the following in the animal laboratory:
- mild, reversible liver effects, cardiac sensitization, respiratory track damage (nose, throat and airways), effects on hearing, central nervous system damage.

May cause irritation to skin, eyes and respiratory tract.

Section 15. Regulatory Information

HCS Classification

HCS Class: Flammable aerosol.
CLASS: Highly toxic.
CLASS: Target organ effects.
CLASS: Reproductive toxins.

U.S. Federal Regulations

TSCA 8 (b) inventory: All ingredients of this product are in compliance with TSCA requirements.
SARA 302/304/311/312 extremely hazardous substances: No products were found.
SARA 302/304 emergency planning and notification: No products were found.
SARA 302/304/311/312 hazardous chemicals: Di 2-Ethylhexyl phthalate [DEHP]; Toluene; 2-Butoxyethanol
SARA 311/312 MSDS distribution - chemical inventory - hazard identification: Carbon Black: delayed health hazard; Toluene: fire, immediate health hazard, delayed health hazard
SARA 313 toxic chemical notification and release reporting: Toluene 20%; 2-Butoxyethanol 1.75%
Clean Water Act (CWA) 307: No products were found.
Clean Water Act (CWA) 311: No products were found.
Clean air act (CAA) 112 accidental release prevention: Di 2-Ethylhexyl phthalate [DEHP]
Clean air act (CAA) 112 regulated flammable substances: Toluene; Ethyl acetate
Clean air act (CAA) 112 regulated toxic substances: Dimethyl ether

International Regulations

EINECS
Not available.

DSCL (EEC)
R12- Extremely flammable.
R20/22- Harmful by inhalation and if swallowed.
R37/38- Irritating to respiratory system and skin.
R40- Possible risks of irreversible effects.
R41- Risk of serious damage to eyes.

International Lists
Australia: Carbon Black
Korea (TCCL): Carbon Black

State Regulations
Pennsylvania RTK: Di 2-Ethylhexyl phthalate [DEHP]
Minnesota: Di 2-Ethylhexyl phthalate [DEHP]
Massachusetts RTK: Di 2-Ethylhexyl phthalate [DEHP]
New Jersey: Carbon Black; Di 2-Ethylhexyl phthalate [DEHP]
Louisiana RTK reporting list: Carbon Black
California prop. 65: This product contains the following ingredients for which the State of California has found to cause birth defects which would require a warning under the statute: Toluene

Section 16. Other Information

Label Requirements

Flammable aerosol. Keep away from sources of heat, sparks, or flames.
May be harmful if inhaled or swallowed. “Keep away from food.” Causes eye irritation. May cause respiratory tract and skin irritation. Possible birth defect hazard. Contains material which causes damage to the following organs: blood, kidneys, liver, bladder, brain, skin, eyes, central nervous system.

Notice to Reader

To the best of our knowledge, the information contained herein is accurate. However, neither the above named supplier nor any of its subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein.

Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.
OWNER’S LETTER

Dear Nissan owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect that relates to motor vehicle safety exists in some 1999-2003 model year Nissan Frontier vehicles equipped with a six cylinder engine and in some 2000-2003 model year Nissan Xterra vehicles equipped with a four or six cylinder engine.

Reason for Recall

The fuel pump terminal on the fuel-sending unit may develop a crack in its plastic molding which could cause the terminal strip to corrode under some environmental conditions. If corrosion occurs, the terminal strip could eventually break. This will cause the fuel pump to stop operating and will result in not being able to start the engine or cause the engine to stop running during vehicle operation, which could result in a crash without warning.

What Nissan Will Do

In the states shown in the table below, where there is heavy use of road salt in the winter and corrosion is likely to occur, the dealer will replace the fuel-sending unit. In the other states, the dealer will inspect the fuel pump terminal on the sending unit for corrosion. If corrosion is present, the dealer will replace the fuel-sending unit. If there is no corrosion, the dealer will apply sealant to the terminal housing to help prevent corrosion in the future. This free service should take about two hours to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon the dealer’s work schedule.

What You Should Do

Contact your Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired. Please bring this notice with you when you keep your service appointment. It will be necessary that your fuel tank be no more than one-quarter full when you bring your vehicle to the dealer in order to minimize the possibility of fuel spill during the repair. Instructions have been sent to your Nissan dealer. If the dealer fails, or is unable to make the necessary repairs free of charge, you may contact the National Consumer Affairs Office, Nissan North America, Inc. at P.O. Box 191, Gardena, California 90248-0191. The toll free number is 1-800-NISSAN1 (1-800-647-7261). You may also contact the Administrator of the National Highway Traffic Safety Administration, 400 Seventh Street SW, Washington, D.C. 20590 or call the toll free Safety Hotline at (888) 327-4236.

If you have paid to have a fuel-sending unit replaced prior to this campaign, you may be eligible for reimbursement of the related expense. Contact Nissan Consumer Affairs at the number listed above for additional information on how to obtain a reimbursement.

Federal regulations require that any vehicle lesser receiving this recall notice must forward a copy of this notice to the lessee within ten days.

Thank you for your cooperation. We are indeed sorry for any inconvenience this may cause you.
