Fig. 1

1. Peel off the incorrect Federal Certification label from the unit and discard it.
2. Use acetone to remove adhesive residue from the trailer. Apply the acetone with a rag, rubbing in a circular motion.
3. Allow the surface to dry for approximately thirty (30) seconds.
4. Remove the protective back off the new Federal Certification label, align the label in the appropriate position and adhere the label to the trailer. Make sure to remove any air bubbles from the sticker.

Caution: Once the new label has come in contact with the trailer, **DO NOT** attempt to remove or adjust it. If this occurs, the label will be permanently damaged and will not adhere properly to the trailer. If the label is damaged, a new label must be ordered.
