**RE: Safety Recall Action B156 - Fuel tank cracking – Follow-up Mailing**  
**Vehicles Affected: Discovery Series I and Range Rover Classic**  
**Model Years: 1993 - 1997**

### Dear Land Rover Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Land Rover has decided that a defect, relating to motor vehicle safety, exists in certain 1994 – 1997 model year Discovery Series I and 1993 – 1995 model year Range Rover Classic vehicles. These vehicles may exhibit cracking in their plastic fuel tanks. Your vehicle is included in this recall action. This letter is the third contact notification sent to the owner of the affected vehicle. Land Rover's records indicate that your vehicle has yet to have this Recall action performed.

### What is the concern?

Cracks can develop at certain plastic "weld" joints on the top portion of the fuel tank, which can cause a noticeable odor of fuel. The cracking can result in signs of liquid fuel on the underside of the vehicle, particularly when filling the tank. Liquid fuel, in the presence of an ignition source, could result in a fire.

### What will Land Rover and your Land Rover Retailer do?

An authorized Land Rover Retailer will replace your fuel tank with an improved design free of charge.

### What should you do?

Please contact your authorized Land Rover Retailer at your earliest convenience to schedule an appointment to have Safety Recall Action B156 completed on your vehicle.

### How long will it take?

Expected repair time is estimated to be approximately two hours to install a new fuel tank. However, due to service scheduling requirements at the Retailer, your vehicle may be needed for a longer period of time.
