SAFETY RECALL NOTIFICATION – R3150410 – 4M50 Idler Shaft Bolt
NHTSA SAFETY RECALL – 05V-451

Vehicle Identification Number – JW6BHF1S82L000589

Dear Mitsubishi Fuso Truck Owner:

This is a follow up to notices you should have received dated December 20, 2005, May 3, 2006 and September 29, 2006 regarding this Safety Recall.

Mitsubishi Fuso Truck of America, Inc. has decided that a defect which relates to motor vehicle safety exists in the 4M50 engine idler gear shaft bolt. On affected vehicles, the cylinder head idler gear shaft bolt may have been insufficiently tightened during initial assembly. Continued operation in this condition could cause the bolt to loosen, resulting in abnormal noise from improper gear alignment. In the worst case, the bolt could break, causing the engine to stall and not restart, causing a crash without warning.

Continued on the back.

Please detach, sign & return this prepaid business reply postcard if any owner/vehicle information requires updating.
