SAFETY RECALL RENOTIFICATION – C0021113 – Front Hub Bearing FM
NHTSA SAFETY RECALL – 04V-477

Vehicle Identification Number – VIN

Dear Mitsubishi Fuso Truck Owner:

This is a follow up to notices you should have received dated October 25, 2004 and March 8, 2006 regarding this Safety Recall.

Mitsubishi Fuso Truck of America, Inc. (MFTA) has decided that a defect which relates to motor vehicle safety exists in the front hub bearings on certain vehicles. On affected vehicles, the front wheel hub outer bearing lock nut may have been improperly tightened during initial assembly, and an insufficient amount of grease may have been applied to the outer bearing. These conditions could result in the outer bearing generating excessive heat and/or breaking. In the worst case, the excessive heat and/or breakage could cause a fire or a crash without warning.

Continued on the back.
