

Mack Trucks, Inc.

Service ALERT

Date: 24 March 2005 **Number:** SA-224-002
To: All U.S. & Canadian Distributors
Attention: Service Manager, Warranty Manager, Parts Manager
From: Mack Reliability Engineering Department
Subject: Hold On Performing SC-292 Fuel Supply Hose Safety Campaign

Important Notice

URGENT: Stop performing the SC-292 Fuel Supply Hose Safety Campaign until further notice.

Mack Reliability Engineering is instituting this hold on this Campaign due to numerous complaints from the field. The complaint is that after installing the 42QE3240P14 fuel supply hose, fuel leakage occurs at the connection between the fuel supply hose and fuel supply pump outlet fitting.

The swage on the elbow end of the fitting for the fuel supply hose (42QE3240P14) is in question and needs to be reviewed by the supplier. Reliability Engineering will notify dealers regarding when the temporary hold on this Campaign ends and the specific actions to take before again performing this Campaign.
