May 31, 2005

Dear Skyline Dealer:

On May 31, 2005, Skyline contacted the National Highway Traffic Safety Administration to report a defect which relates to motor vehicle safety in its 2005 Model 385 "Nomad", "Layton" and "Aljo" brand "Rampage" fifth wheel trailers manufactured between June 17, 2004 and December 10, 2004 at the Skyline manufacturing facility in McMinnville, Oregon.

The defect is the result of inadequate support in the front c-channel cross members and gooseneck which could cause the fiberglass cap to be damaged and/or the front cross member to buckle or bow. If the cross member buckles or bows on the trailer while being towed, a crash could occur.

Skyline will contact all customers who purchased one of these recreational vehicles. Our records show that you received the following units. Please furnish Skyline with the names and addresses of the purchasers or inform Skyline if the unit remains in your stock.

<u>Serial Number</u>	<u>Date Shipped</u>	<u>Name and Address of Retail Purchaser</u>
----------------------	---------------------	---

Skyline will return the units to its factory in McMinnville, make the repair and return the unit to you if the unit is still in your stock or to your customer.

Skyline apologizes for any inconvenience this may cause you or your customers. Thank you for your help in remedying this situation on a timely basis.

BRINGING AMERICA HOME. BRINGING AMERICA FUN.
