September 16, 2005

**TO:** All U.S. Ford Dealers

**SUBJECT: ADVANCE NOTICE: Upcoming Safety Recall 05S36**  
Certain 2005 Model Year F-650 and F-750 Vehicles Equipped with Hydraulic Brakes  
Driveline Parking Brake Anchor Bolt Replacement

**REASON FOR THIS ADVANCE NOTICE**

To inform you that Ford is notifying the National Highway Traffic Safety Administration (NHTSA) of an upcoming safety recall on the affected vehicles. Once NHTSA has been informed, there is a possibility that you may be contacted by customers about the recall. This notice will help you answer customer questions. The parking brake anchor bolt on these vehicles may be susceptible to fatigue loading and may ultimately, over time, fracture. This could result in the parking brake not performing as intended. It is anticipated that this condition will not occur until after approximately one year in service.

**AFFECTED VEHICLES**

Certain 2005 model year Ford F-650 and F-750 vehicles equipped with hydraulic brakes and built at the Escobedo Assembly Plant from June 4, 2004 through March 31, 2005.

**SERVICE ACTION**

It is anticipated that the complete dealer bulletin announcing this upcoming action will be provided to dealers the week of October 10, 2005.

**CUSTOMER NOTIFICATION**

Owners of record will be notified after dealers receive service repair and parts ordering information. It is anticipated that this will occur on approximately October 13, 2005.

**OASIS**

OASIS will be loaded with the affected vehicle VINs when the recall is formally announced.

**QUESTIONS**

Special Service Support Center (Dealer Only) Questions.....1-800-325-5621

Sincerely,

Frank M. Ligon
