

March 2005

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Federal regulation requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

Reason For This Recall: General Motors has decided that certain 2004 model year Cadillac SRX and XLR, and Pontiac Grand Prix vehicles fail to conform to Federal/Canada Motor Vehicle Safety Standard 124, Accelerator Control Systems. If one of the two accelerator pedal return springs fails, and the temperature is -30° C to -40° C (-22° F to -40° F) for the Cadillac XLR and Pontiac Grand Prix, or -10° C to -40° C (14° F to -40° F) for the Cadillac SRX, the engine may not return to idle within three seconds as required. If this were to occur, greater brake pedal force and a longer distance may be required to stop the vehicle. If stopping distance is limited, a vehicle crash could occur.

What Will Be Done: Your dealer will replace the electronic control pedal assembly. This service will be performed for you at **no charge**.

How Long Will The Repair Take? This service correction will take approximately 15 to 40 minutes. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

Contacting Your Dealer: To limit any possible inconvenience, we recommend that you contact your dealer as soon as possible to schedule an appointment for this repair. By scheduling an appointment, your dealer can ensure that the necessary parts will be available on your scheduled appointment date. Should your dealer be unable to schedule a service date within a reasonable time, you should contact the appropriate Customer Assistance Center at the listed number below. The Customer Assistance Center's hours of operation are from 8:00 AM to 11:00 PM, EST, Monday through Friday.
