

August 2005

Dear General Motors Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

**Reason For This Recall:** General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2004 Buick Rainier and GMC Envoy XUV; 2003-2004 Chevrolet TrailBlazer, TrailBlazer EXT; GMC Envoy, Envoy XL; and Oldsmobile Bravada vehicles. Some of these vehicles have an intermittent condition in which the turn signals may not operate as designed. Material build up on the flasher relay may cause the turn signals to flash on both sides of the vehicle when activated, similar to hazard warning flashers, or they may illuminate and remain illuminated instead of flashing. The instrument panel would indicate the incorrect operation if this were to occur. Incorrect operation of the turn signal indicator could fail to warn other drivers of your intentions and could lead to a vehicle crash.

**What Will Be Done:** Your GM dealer will replace the flasher relay module. This service will be performed for you at **no charge**.

**How Long Will The Repair Take?** This service correction will take approximately 15 minutes. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

**Contacting Your Dealer:** To limit any possible inconvenience, we recommend that you contact your GM dealer as soon as possible to schedule an appointment for this repair. By scheduling an appointment, your dealer can ensure that the necessary parts will be available on your scheduled appointment date. Should your dealer be unable to schedule a service date within a reasonable time, you should contact the appropriate Customer Assistance Center at the listed number below. The Customer Assistance Center's hours of operation are from 8:00 AM to 11:00 PM, EST, Monday through Friday.
