Safety Recall 05S31

Mr. John Sample
123 Main Street
Anywhere, USA 12345

Your Vehicle Identification Number: 12345678901234567

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Ford Motor Company has decided that a defect which relates to motor vehicle safety exists in certain 2005 model year F-650 and F-750 Trucks with aluminum wheels.

We apologize for this situation and want to assure you that, with your assistance, we will correct this condition. Our commitment, together with Ford dealers, is to provide you with the highest level of service and support.

What is the issue?

On your vehicle, it may be possible that the two in-board wheels on the rear axle were not properly machined before being installed. Wheels that have not been properly machined may experience premature cracking on the wheel disc mounting face and may result in wheel separation. A wheel separation of the rear inboard wheel may affect the braking, steering and handling of the truck, which could result in a crash.

What will Ford and your dealer do?

Ford Motor Company and your dealer will inspect the two in-board wheels on the rear axle and, if necessary, replace the wheels and remount the tires free of charge (parts and labor). We urge you to return to your dealer for this service.

How long will it take?

The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time. In addition, your vehicle will require inspection prior to determining if parts need to be ordered.

What are we asking you to do?
