

**Certain 1989 Through 1995 Model Year Truck 4WD Steering Relay Rod
SAFETY RECALL NOTICE**

Dear Toyota Customer:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Toyota has decided that a defect, which relates to motor vehicle safety, exists in certain 1989 through 1995 model year Truck 4WD vehicles equipped with Power Steering.

What is the problem?

On the involved vehicles, if the steering wheel is repeatedly turned under certain conditions where high steering effort and power assist are required, for instance, when fully turning the wheel while the vehicle is stopped, a fatigue crack may develop in the Steering Relay Rod. In the worst case, the Steering Relay Rod may fracture, causing a loss of vehicle steering control and thus increasing the possibility of a crash.

What will Toyota do?

Any Toyota dealer will replace the Steering Relay Rod with an improved one at **NO CHARGE** to you.

What should you do?

Please contact your authorized Toyota dealer to make an appointment to replace the Steering Relay Rod with an improved one, as soon as possible. The repair will take approximately four hours. However, depending upon the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

We request that you present this notice to the dealer at the time of your service appointment.

If you no longer own the vehicle, please indicate so on the enclosed postage-paid form, providing us with the name and address of the new owner.
