According to our information, your unit identified on the enclosed form is affected. *Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.*

Monaco Coach Corporation became aware of a defect from Tredit Tire and Wheel, the supplier of the affected wheels. The defect relates to poor weld quality and insufficient press fit between the rim and the disc. The center of the wheel has the potential to separate from the rim and cause the wheel to wobble and cause a momentary vibration, or the mounted tire on the wheel could lose air causing the tire to go flat. This could result in the vehicle becoming unstable in transit.
