Vehicle Identification Number: **Vin#**
Model: **Model#** Serial: **Serial#**

This notice is sent to you in accordance with the requirements of the National Traffic & Motor Vehicle Safety Act. Please take notice that Gulf Stream Coach, Inc. is issuing a voluntary recall under the provisions of the National Traffic and Motor Vehicle Safety Act.

Gulf Stream Coach, Inc. has decided that a defect which relates to motor vehicle safety exists in 2005-2006 model year Gulf Stream Coach, Inc. Vista Cruiser class "B" motor homes. This defect relates to the steel bracket securing the holding tank. The holding tank bracket is installed in a location in which it presses against the OEM Brake Lines.

This condition creates points of possible wear due to vibration during vehicle operation, which over time could cause the brake lines to fatigue and leak brake fluid. This could cause failure of the brakes to operate properly causing a crash without warning, thereby resulting in property damage or bodily injury.

REMEDY

The following instruction should be followed to insure proper brake line clearance on the Vista Cruiser MB. (See attached pictures)

- 1.) Make sure holding tank is empty
- 2.) Remove front tank bracket bolt nearest to the floor
- 3.) Pull bracket down (they are flexible enough, the other bolt does not need to be removed) and insert between the brake lines and the frame
- 4.) Reattach the bracket where the bolt was removed
- 5.) Repeat above for the rear bracket
