**What is the concern?**

A number of vehicles with Automatic Transmissions may have a defective part within the automatic transmission. The concern is that when the gear selector lever is moved to the position 'P' (Park) the Park function within the transmission may not be engaged. If the parking brake is not applied, the vehicle may roll away, **which could result in a crash.**”

Jaguar recommends that until such time as this repair is carried out, you should ensure that when the gear selector is moved to the position 'P' (park) that the parking brake is also applied.

**What will Jaguar and your Dealer do?**

Jaguar Cars will replace the parking pawl guide plate within the automatic transmission on your vehicle.
